This report has been up-issued to Issue 2 to include a statement in section 1.6

ENGINEERING STATEMENT

The measurements shown in this report were made in accordance with the procedures described on test pages. All reported testing was carried out on a sample equipment to demonstrate limited compliance with FCC 47 CFR Part 90 and FCC 47 CFR Part 2. The sample tested was found to comply with the requirements defined in the applied rules.

SECTION 1

REPORT SUMMARY

FCC Testing of the
Cobham Tactical Communications NETNode IP Mesh Radio Phase 5
In accordance with FCC 47 CFR Part 90 and FCC 47 CFR Part 2

1.1 INTRODUCTION

The information contained in this report is intended to show the verification of FCC Testing of the Cobham Tactical Communications NETNode IP Mesh Radio Phase 5 to the requirements of FCC 47 CFR Part 90 and FCC 47 CFR Part 2.

Objective	To perform FCC Testing to determine the Equipment Under Test's (EUT's) compliance with the Test Specification, for the series of tests carried out.
Manufacturer	Cobham Tactical Communications
Model Number(s)	Mesh Phase 5
Serial Number(s)	033812
Number of Samples Tested	1
Test Specification/Issue/Date	FCC 47 CFR Part 90 (2014) FCC 47 CFR Part 2 (2014)
Incoming Release Date	Application Form 16 December 2015
Disposal Reference Number Date	Held Pending Disposal Not Applicable Not Applicable
Order Number Date	PO-038839-1 17 November 2015
Start of Test	8 December 2015
Finish of Test	15 December 2015
Name of Engineer(s)	G Lawler M Russell M Toubella
Related Document(s)	ANSI C63.4: 2009

Note: This report shows compliance to the limits of the specification over the frequency range 2000 MHz to 2500 MHz.

However, the authorised frequency band is 2450 MHz to 2483.5 MHz and the product will be limited to transmit in this band. This report shows compliance over and including the 2450 MHz to 2483.5 MHz frequency band.

1.2 BRIEF SUMMARY OF RESULTS

A brief summary of the tests carried out in accordance with FCC 47 CFR Part 90 and FCC 47 CFR Part 2 is shown below.

Section	Specification Clause		Test Description	Result	Comments/Base Standard
	Part 90	Part 2			
Transmit - 16-QAM 2/3 - 2.5 MHz Bandwidth - PoE at 50 V					
2.3	-	2.1049	Occupied Bandwidth	Pass	
Transmit - 16-QAM 2/3 - 3.0 MHz Bandwidth - PoE at 50 V - PoE at 50 V					
2.3	-	2.1049	Occupied Bandwidth	Pass	
Transmit - 16-QAM 2/3 - 3.5 MHz Bandwidth - PoE at 50 V - PoE at 50 V					
2.3	-	2.1049	Occupied Bandwidth	Pass

1.3 APPLICATION FORM

EQUIPMENT DESCRIPTION	
Model Name/Number	NETNode IP Mesh Radio Phase 5
Part Number	NETNode2x2W-5R-200250
Hardware Version	1.0
Software Version	v0.1I
FCC ID (if applicable)	XRFNETNODE-5R
Industry Canada ID (if applicable)	N/A
Technical Description (Please provide a brief description of the intended use of the equipment)	Cobham NETNode IP mesh radios can be combined in a fluid self forming, self healing mesh containing up to sixteen radios. The entire mesh can operate in a selectable bandwidth of between 2.5 and 10MHz, providing greater than 25Mb/s of IP data. The highly f

1.4 PRODUCT INFORMATION

1.4.1 Technical Description

The Equipment Under Test (EUT) was a Cobham Tactical Communications NETNode IP Mesh Radio Phase 5. A full technical description can be found in the manufacturer's documentation.

1.5 TEST CONDITIONS

For all tests the EUT was set up in accordance with the relevant test standard and to represent typical operating conditions. Tests were applied with the EUT situated in a shielded enclosure.

The EUT was powered from a 110 V AC supply.

FCC Measurement Facility Registration Number
90987 Octagon House, Fareham Test Laboratory

1.6 DEVIATIONS FROM THE STANDARD

No deviations from the applicable test standard were made during testing.

1.7 MODIFICATION RECORD

Modification 0 - No modifications were made to the test sample during testing.

Mesh Phase 5 S/N: 033812 - Modification State 0

2.1.3 Date of Test

9 December 2015

2.1.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.1.5 Test Procedure

The test was applied in accordance with the test method requirements of KDB 971168 D01 v02 r02, clause 5.2.1.

Measurements were performed on each individual antenna port and then summed as described in KDB 662911 D01 v02 r01 clause E.2 (b).

2.1.6 Environmental Conditions

Ambient Temperature	24.2°C
Relative Humidity	32.6%

2.2 TYPE OF EMISSIONS

2.2.1 Specification Reference

FCC 47 CFR Part 90, Clause 90.207
FCC 47 CFR Part 2, Clause 2.1047

2.2.2 Equipment Under Test and Modification State

Mesh Phase 5 S/N: 033812 - Modification State 0

2.2.3 Date of Test

8 December 2015

2.2.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.2.5 Test Procedure

The manufacturer has declared the class of emission as D1W. The EUT uses 16QAM, QPSK and BSPK modulation schemes with nominal bandwidths of 2.5 MHz, 3 MHz, 3.5 MHz, 5 MHz, 6 MHz, 7 MHz and 8 MHz. A plot of the fundamental configured to 16 QAM 2/3 with 6 MHz bandwidth has been included for illustrative purposes.

2.2.6 Environmental Conditions

Ambient Temperature	24.2°C
Relative Humidity	38.4%

2.2.7 Test Results

110 V AC Supply

Transmit - 16-QAM 2/3 - 6.0 MHz Bandwidth - PoE at 50 V, Type of Emissions Result

The class of the emission has been declared as D1W.

Transmit - 16-QAM 2/3 - 6.0 MHz Bandwidth - PoE at 50 V, Type of Emissions Plot

FCC 47 CFR Part 90, Limit Clause 90.207

The class of emission declared is authorised for use within the scope of specification.

2.4.1 Specification Reference

FCC 47 CFR Part 90, Clause 90.210
FCC 47 CFR Part 2, Clause 2.1051

2.4.2 Equipment Under Test and Modification State

Mesh Phase 5 S/N: 033812 - Modification State 0

2.4.3 Date of Test

9 December 2015

2.4.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.4.5 Test Procedure

This test was performed in accordance with the test method requirements of KDB 971168 D01 v02r 02, clause 6.

Remarks

Measurements were only performed on a single port as the manufacturer declared they are electrically identical. For spectra less than 30 MHz, a reduced RBW was used, however the limit was also reduced by 10 Log (100/Actual RBW used in kHz). An RMS detector with max hold has been used to obtain a worst case average result.

2.4.6 Environmental Conditions

Ambient Temperature	24.2 - 24.6°C
Relative Humidity	32.7%

Product Service

Spurious at Antenna Terminals Plot

Product Service

Transmit - 16-QAM 2/3 - 6.0 MHz Bandwidth - PoE at 50 V, 2500 MHz, 8 GHz to 18 GHz,
Spuious at Antenna Terminals Plot

FCC 47 CFR Part 90, Limit Clause 90.210(c)

(c) Emission Mask C. For transmitters that are not equipped with an audio low-pass filter, the power of any emission must be attenuated below the unmodulated carrier output power (P) as follows:

- (1) On any frequency removed from the center of the authorized bandwidth by a displacement frequency (f_d in kHz) of more than 5 kHz, but not more than 10 kHz: At least $83 \log(f_d/5)$ dB;
- (2) On any frequency removed from the center of the authorized bandwidth by a displacement frequency (f_d in kHz) of more than 10 kHz, but not more than 250 percent of the authorized bandwidth: At least $29 \log(f_d/11)$ dB or 50 dB, whichever is the lesser attenuation;
- (3) On any frequency removed from the center of the authorized bandwidth by more than 250 percent of the authorized bandwidth: At least $43 + 10 \log(P)$ dB.

2.5 EMISSION MASK

2.5.1 Specification Reference

FCC 47 CFR Part 90, Clause 90.210
FCC 47 CFR Part 2, Clause 2.1051

2.5.2 Equipment Under Test and Modification State

Mesh Phase 5 S/N: 033812 - Modification State 0

2.5.3 Date of Test

15 December 2015

2.5.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.5.5 Test Procedure

The test was applied in accordance with the test method requirements KDB 971168 Clause 7 and ANSI C63.4 Clause 8.

For emissions greater than 50 kHz removed from the edge of the authorized bandwidth, measurements were performed radiated as follows:

Radiated; A preliminary profile of the Spurious Radiated Emissions was obtained up to the 10th harmonic by operating the EUT on a remotely controlled turntable within a semi-anechoic chamber. Measurements of emissions from the EUT were obtained with the Measurement Antenna in both Horizontal and Vertical Polarisation. The profiling produced a list of the worst-case emissions together with the EUT azimuth and antenna polarisation.

Using the information from the preliminary profiling of the EUT, the list of emissions was then confirmed or updated under Alternative Open Site conditions. Emission levels were maximised by adjusting the antenna height, antenna polarisation and turntable azimuth.

The EUT was set to transmit on maximum power with each channel tested separately.

For any emissions found the EUT was then removed from the chamber and replaced with a substitution antenna. Using a signal generator the level was adjusted to achieve the same value on the measuring instrument as previously recorded with the EUT. The final result was determined by a calculation using the signal generator level, antenna gain and cable loss.

The measurements were performed at a 3m distance unless otherwise stated.

2.5.6 Environmental Conditions

Ambient Temperature	20.5°C
Relative Humidity	47.0%

2.5.7 Test Results

2.6 FREQUENCY STABILITY**2.6.1 Specification Reference**

FCC 47 CFR Part 90, Clause 90.213
FCC 47 CFR Part 2, Clause 2.1055

2.6.2 Equipment Under Test and Modification State

Mesh Phase 5 S/N: 033812 - Modification State 0

2.6.3 Date of Test

10 December 2015 & 11 December 2015

2.6.4 Test Equipment Used

The major items of test equipment used for the above tests are identified in Section 3.1.

2.6.5 Test Procedure

Measurements were performed in accordance with FCC 47 CFR Part 2, clause 2.1055.

Remarks

The EUT was not capable of transmitting an unmodulated carrier therefore the 10 dB bandwidth points were measured and the centre frequency calculated.

2.6.6 Environmental Conditions

Ambient Temperature	22.7 - 23.4°C
Relative Humidity	35.4 - 47.0%

Product Service

2.6.7 Test Results

Transmit - 16-QAM 2/3 - 6.0 MHz Bandwidth - 12 V DC, 2250 MHz, Transmit, 16-QAM, Frequency Tolerance Under Voltage Variations Results

Voltage	Fundamental Frequency Deviation (ppm)
12 V DC	-0.18
10.2 V DC	0.18
13.8 V DC	0.36

Remarks

The customer declared that the unit has a low voltage cut out that activates at approximately 9.5 V DC. FCC Part 2, clause 2.1055 states that the voltage shall be measured at the input to the cable supplied with the equipment. The voltage drop from the cables supplied was sufficient enough to activate this cut off when the voltage was set at 10.2 V DC. The measurement result recorded was with a supply voltage measured as 11.3 V DC.

FCC 47 CFR Part 90, Limit Clause 90.213

The frequency error shall not exceed 2.5 ppm

Product Service

Transmit - 16-QAM 2/3 - 6.0 MHz Bandwidth - 48 V DC, 2250 MHz, Transmit, 16-QAM,
Frequency Tolerance Under Voltage Variations Results

Voltage	Fundamental Frequency Deviation (ppm)
48 V DC	0.89
40.8 V DC	-0.71
55.2 V DC	-0.71

FCC 47 CFR Part 90, Limit Clause 90.213

The frequency error shall not exceed 2.5 ppm

Product Service

2.7.7 Test Results

110 V AC Supply

Transmit - 16-QAM 2/3 - 6.0 MHz Bandwidth - PoE at 50 V, Modulation Characteristics,
Customer Description

The modulation schemes used in the device are 16-QAM 2/3, 16-QAM 1/2, QPSK 2/3, QPSK 1/2 and BPSK 2/3. The different modulation schemes are used by the radio to provide an optimal balance of robustness and data capacity as the quality of the link changes. The most robust modes will sustain the link the longest as the path loss increases through range or environment (e.g. urban NLOS) whilst reducing the data capacity. Where the link can sustain it higher order modulation is used to maximise the data throughput of the system.

FCC 47 CFR Part 2, Limit Clause 2.1047 (d)

A curve or equivalent data which shows that the equipment will meet the modulation requirements of the rules under which the equipment is to be licensed.
