

To whom it may concern: The Real Phone Card Corp completed the initial filing for FCC certification and request consideration of the following:

Background:

The phone to be tested is Model R12C, a GSM phone operating at 850/1900 MHz. It is a voice and SMS capable product with an Infineon chip set Model 7880. We want to certify to Rules Part 15, Part 22H, Part 24E, and SAR

Request the Following consideration:

1. We completed Form 731 for Rule Part 22 (850 MHz) as this was the only choice in the pull down menu.
2. We completed the Form 731 Registration and paid the Fees requested (\$850.00)
3. We attempted to file another Form 731 for Rule Part 24E (1800 MHz) but the 'system' responds with the fact we have completed registration.

Action:

We request guidance on how to proceed so that our test results will be reviewed for part 15, Part 22H, Part 24E, and SAR.
