

iON-it st-01 Smart Tag

Quick Start Guide

Device Overview

- Power Button – Turns the device on/off
- Buzzer – Emits sound for alerts
- Charging Port – USB Type-C charging

Getting Started

1. Charge the Battery

Before powering on, charge the Smart Tag using a USB Type-C cable.

It takes approximately 1.5 hours to fully charge the battery when the device is turned off.

2. Power On

Press and hold the power button for 3 seconds to turn on the iON-it ST-01 Smart Tag.

3. Connect via Find My App

1. Open the Find My app on your iPhone or iPad.
2. Tap Items → tap the Add (+) button → select Add Other Item.
3. Name your Smart Tag and tap Continue.
4. Follow the on-screen instructions to complete setup.

4. Power Off

To turn off the device, press and hold the power button for 5 seconds.

5. Adding Multiple Tags

If you have more than one Smart Tag:

-  Turn on and add only one tag at a time.

The Find My app can register only one tag at a time.

FCC ID: XXF-ST01

Manufacturer:
ARKNV International, Inc.
12F., No.81, Zhongcheng Road
Tucheng District, 236658
New Taipei City, Taiwan

Notice to Users

FCC Caution:

Part 15.21

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Part 15.19

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Part15.105

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.

Hereby, ARKNV International Inc declares that this product is in compliance with essential requirements and other relevant provisions of Directive 2014/53/EU. This product is allowed to be used in all EU member states.

RADIO FREQUENCY MAXIMUM TRANSMIT POWER AND FREQUENCY BAND INFORMATION

Frequency bands	Frequency range	Maximum output power
BT-BLE	2402-2480MHz	9.57dBm(EIRP)
