

PLB3

rescueME

Personal Locator Beacon with AIS

Your worldwide link to emergency services

The best of both worlds...
...the **PLB3** combines the Global response of the 406MHz Cospas-Sarsat Satellite rescue services with the transmission of AIS Man Overboard signals to alert vessels equipped with AIS receivers within VHF radio range and a 121.5MHz RDF signal to guide emergency services directly to your location.

Designed to install within a Life Jacket allowing semi-automatic activation in the event you fall overboard, the PLB3 offers the most comprehensive communication set to ensure a rapid response and rescue.

Galileo Return Link Service Capable

406 MHz & 121.5 MHz Signals

Integrated AIS Man Overboard Alert

Visible Light and IR Strobe

This device has not been authorized by the rules of the Federal Communications Commission, FAA, EASA or Cospas-Sarsat. This device is not, and may not be, offered for sale or lease, or sold or leased, until authorization is obtained.

rescueME

Personal Locator Beacon with AIS

Your worldwide link to emergency services

As long as AIS Man Overboard devices and Cospas-Sarsat Personal Locator Beacons have been in use the question has been asked: When can we have both in one package?

With multi levels of integrated signal technology – GNSS positioning, powerful 406 MHz signal, and AIS transmission – the rescueME PLB3 uses AIS technology to alert all vessels within VHF range by sounding alarms and indicating a MOB position to people in the best position to offer immediate aid, while at the same time quickly and accurately relaying your position to a worldwide network of search and rescue satellites. Additionally, a built-in visible strobe and infrared strobe facilitate nighttime, or other low visibility, rescues.

When installed in a compatible life jacket the PLB3 will activate upon inflation of the jacket initiating the call for assistance even if a casualty entering the water may be incapacitated.

Whether the PLB3 is installed in a life jacket or carried on a user's person, innovative design elements and multifunction clips can be used in conjunction with the beacon, providing numerous wear-ability options that address a variety of usage applications.

PLB3: How does it work?

PLB3: Comment ça marche?

- 406 MHz Signal Signal 406 MHz
- GNSS Signal Signal GNSS
-)))) AIS MOB Signal Signal AIS MOB
- Galileo RLS Signal Signal RLS

Specification

Part Number: 732S-03668

Model Number: PLB3

Activation

Manual

Semi-automatic upon inflation of a compatible life jacket

Class

Class 2 Operation (@ -4°F / -20°C)

Buoyant

NO (optional flotation jacket available)

Size

7.87" (L) x 1.41" (W) x 1.81" (D)

20.0 cm (L) x 3.6 cm (W) x 3.0 cm (D)

Weight

0.42 lbs (190 g)

Operational Life

>24hours @ -20°C (-4°F)

Temperature Range

Storage: -30°C to +70°C (-22°F to +158°F)

Operating: -20°C to +55°C (-4°F to +131°F)

Waterproof

10m (1.0bar) : 60minutes

Battery

Non-rechargeable Lithium Iron Batteries

Battery Replacement

Due 6 years from date of manufacture or 5 years after beacon is placed into service, whichever is first, or after emergency use.

Warranty

5 Years

Approvals (Pending)

Cospas-Sarsat, FCC, ISCED, CE, UKCA, AMSA.

Key Features

Simple Life Jacket Integration

Multi GNSS

5 Year Battery Life

Rugged and Waterproof

24 hours Operation

MEOSAR Compatible
