	Last Amended by	S Moore
Document Title	V200 and SR 303 GMDSS VHF Handheld Radios	

Product Introduction

The V200 and SR303 products are the same radio with different branding. The electronic hardware and firmware are identical in each model with the only differences being in housing colour and labelled branding.

Ocean Signal safeSEA V200

ACR SR 303

For approval testing units were presented with both liveries and passed through testing together.

The V200 unit was modified to allow access to the speaker and microphone inputs by the addition of an internal wiring loom and waterproof connector fitted alongside the antenna on the top of the unit.

The SR 303 unit was unmodified.

Both units were supplied with Primary batteries, rechargeable batteries and battery eliminator adapters for PSU use. The battery charging cradle shown in the user information is approved under a different standard and is not part of this submission.
