Description of Test Item

The Bluetooth Low Energy module is located on PCB 1105, and is controlled by the main microcontroller located on PCB 1101, both located inside the LCU 5351.

A chip antenna is also located on the PCB 1105. This module will communicate with a BLE enabled Mobile phone held in front of the unit.

Theory of Operation

The module follows the Bluetooth low energy specification 4-0, operating in the 2.4GHz band

The module is designed using the nRF52832 system on chip from Nordic Semiconductor.

The nRF52832 is built around a 32-bit ARM Cortex M0 CPU with integrated memory and an embedded 2.4GHz transceiver.

It depends on, and generates, two different clocks. A high frequency clock and a low frequency clock

The high frequency clock at 32 MHz is controlled by an external 32 MHz crystal, and the low frequency clock at 32768Hz is controlled by an external 32768Hz crystal.

1.2 Normal test conditions

Temperature: 20 - 26 °C
Relative humidity: 45 - 55 %
Normal test voltage: 4.5 V dc(3x1.5Vdc AA batteries)

The values are the limit registered during the test period. All tests were performed with fully charged batteries.

1.7 Worst-Case Configuration and Mode

Radiated Emissions was performed with the EUT set to transmit at the channel with the highest output power as worst-case scenario.

1.8 Comments

The output level is set to maximum in the software.

The radiated measurements are tested on three axis.

Three fully charged primary batteries are used.

All ports were populated during spurious emission measurements.

2 TEST REPORT SUMMARY

2.1 General

All measurements are traceable to national standards.

The tests were conducted for the purpose of demonstrating compliance with FCC CFR 47 Part 15, paragraph 15.247 and Industry Canada RSS-247 Issue 2.

Tests were performed in accordance with ANSI C63.4-2014 and ANSI C63.10-2013.

Radiated tests were performed in a semi-anechoic shielded room ($f < 1$ GHz) and a fully-anechoic shielded room ($f > 1$ GHz) at a measuring distance of 3m.

A description of the test facility is on file with the FCC and Industry Canada.
