2. Appearance

3. LED Status

● LED information

- There are four LEDs for displaying MiFi status.

LTE

Green	Signal strength (Strong)
Yellow	Signal strength (Medium)
Red	Signal strength (Weak)
Red (Blinking)	Network connection failure
Yellow (Blinking)	LTE is connecting

LoRa

Green	Signal strength (Strong)
Yellow	Signal strength (Medium)
Red	Signal strength (Weak)
Red (Blinking)	Connecting and Authenticating
Yellow (Blinking)	Network connection failure

WiFi

Green	A device has been connected
Yellow	No device has been connected

BATT

Green	50~100% battery level at Power on state Charging complete at Power on/off/Sleep state Charging stops as charging temperature exceeds at Power off state.
Green (Blinking) Interval 1 sec. Interval 0.5 sec.	Recharging battery to 50~99% at Power on state Charging stops as charging temperature exceeds
Yellow	15~49% battery level at Power on state
Yellow (Blinking) Interval 1 sec. Interval 0.5 sec.	Recharging battery to 15~49% at Power on state Charging stops as charging temperature exceeds
Red	0~14% battery level at Power on state Charging at Power off/Sleep state
Red (Blinking) Interval 1 sec. Interval 0.5 sec.	Recharging battery to 0~14% at Power on state Charging stops as charging temperature exceeds

4. Inserting the SIM Card

Using the USIM PIN provided, remove the USIM cover and insert the USIM in the shape as shown.

5. Button Operation

● Power On

- Press & hold Power button for 3 seconds at Power off state. All LED is on sequentially.

● Power Off

- Press & hold Power button for 3 seconds at Power on state. All LED is off.

● Mode Change

「Change LTE↔LoRa」: Press & hold the LTE/LoRa button for about 3~7 seconds at Power on state, The LTE & LoRa LED will show a blinking yellow before switching to the designated mode (LTE/LoRa).

The end state is a steady LED for LTE or LoRa.

「Change Hibernation↔Wake up」: Press & hold the LTE/LoRa button for about 7~10 seconds at Power on state, the LoRa & WiFi LED will show a blinking yellow, before showing the LTE / WiFi / Battery LED.

● Hibernation

「Hibernation Check」: Press & hold the LTE/LoRa button for about 1 second at hibernation on state, the LoRa & WiFi LED will show a blinking yellow.

An interval of 15 seconds is required to check the hibernation mode repeatedly.

● Factory Reset

- Press & hold the Power button and LTE/LoRa button for about 10 seconds at Power on state, and all LED will show a blinking red.

6. Charging before use

Please fully charge the product before using.

● Charging with USB cable

- Connect the MiFi to the Power Adapter or PC using a USB cable.

7. Network Settings

● How to connect to WiFi

- Identify the SSID on the back of the product and PASSWORD to connect.
- The default credentials are used to connect the external device to the MiFi.

SSID	PASSWORD
MiFi_XXXXXX	12345678

- SSID : XXXXX is last 6 characters of MAC address.

- This product can be used and controlled with a monitoring app and Web Portal.
- Enter <http://192.168.233.1> in the addresss bar of web browser to access the Web Portal.

8. MiFi Monitoring App – How to use

Launch MiFi Monitoring App on the handset.

■ App screen UI components.

	• Header section - MiFi Monitoring Application (app title) - Setting icon (button) - LTE connection status and signal level(indicator)
	• Upper section - Network mode and status - Battery status - Charging status - [Reboot] (button) - [Power Off] (button) - [To LoRa] or [To LTE] (button)
	• Lower section - Network status : LTE, LoRa, WiFi Disconnected - Network information - LTE : MCC/MNC, eNB ID , SRSP/RSRQ, RSSI/SINR, Data Rate, TAC, PCI - LoRa : RSSI, SNR, Class, Channel, Activation Mode

※ For details, please refer to the MiFi Monitoring App User Manual.

9. MiFi Web Portal – How to use

1. Web Portal

The WEB server connection is necessary to change the WiFi settings or to set its detailed functions. Go to <http://192.168.233.1> to access the MiFi Web Portal, and then the login screen will appear upon connected.

imL C6400W

ID

PW

Please enter your ID and Password to log in to the Web user Program.
The default login ID and Password of the market conditions, refer to the User's Guide.

FORGOT PASSWORD

- PC must be connected to the MiFi through USB Tethering or WiFi before accessing the MiFi Web Portal.
- After executing the web browser, enter "http://192.168.233.1" in the address window.

ID	user
Password	admin

• How to change the Web Portal Password:
「Web Log-in → Device Settings → Change Password」

● Web Portal Layout

Displays basic MiFi device status information and operation menu.

Item	Description
 Logout	Web Portal Log out button
 1 / 1	The current number of connected devices / Maximum number of allowed devices for connection
 100%	Display of battery status  Discharging  Charging  Stop charging (Beyond charging temperature)
 LTE	Network mode (LTE/LoRa) and signal strength
	Switch network mode between LTE and LoRa
	Reboot button
	Power off button

■ Summary

Displays summary information for each network serviced by the MiFi device.

The screenshot shows the IML C6400W web interface. The top navigation bar includes tabs for Summary, WiFi Settings, LTE, LoRa, Device Settings, and Upgrade. The left sidebar contains user information (user Welcome, Logout), device status (0/1 users, 100% battery, LTE signal), and action buttons (To LoRa, Reboot, Power OFF). The main content area displays the Summary page, which includes the Model ID (IML-C6400W) and Software version (R0126). Below this, there are three expandable sections: LTE Information, LoRa Information, and WiFi Information, each with a 'Detail' or 'Modify' link.

Item	Subordinate Item	Description
LTE Information	Connected Status	Connection status of LTE.
	Connected Time	LTE Service Time.
	IP Address	LTE IP Address.
	MTU Size	Maximum transmission unit.
LoRa Information	Connected Status	Connection status of LoRa.
	Activation Mode	Current Activation Mode.
WiFi Information	WiFi Name(SSID)	Device Name of WiFi Network.
	WiFi Channel	Wireless Frequency (Channel).
	WiFi Security	Security Mode of Network.

Input Code is Entered Remaining number : 3 times

Existing PIN Code(PIN) (4~8 Number)

New PIN Code (4~8 Number)

New PIN Code Retry (4~8 Number)

Check

Item	Subordinate Item	Description
USIM Card Lock	USIM Card Lock	Set to enter a PIN code when connecting to an LTE network.
	Input PIN Code	Enter Device's PIN code.
PIN Code Change	Input Code is Entered	Number of times entered incorrectly.
	Existing PIN Code	PIN code currently in use.
	New PIN Code	New PIN code to change.
	New PIN Code Retry	Enter the new PIN code again.

Caution

- PIN code is only numeric 4~8 digits.
- The PIN code will be blocked, if user keys in the incorrect PIN for 3 times.
- If the PIN block state is reached, you should input the correct PUK.
- Entering PUK incorrectly too many times (normally ten) can get your SIM disabled.

■ APN Setting

「 LTE > APN Setting 」

The APN name is to be defined by the user or Administrator. The MNC, MCC information should be included with the APN name to match the SIM card inserted.

A maximum of 4 APNs can be provisioned.

The screenshot shows the IML C6400W web interface. The top navigation bar includes links for Summary, WiFi Settings, LTE, LoRa, Device Settings, and Upgrade. The left sidebar contains user information (user Welcome, Logout), status indicators (0/1, 100%, LTE), and buttons for To LoRa, Reboot, and Power OFF. The main content area is titled 'APN Setting' and shows a table for adding APNs. The table has columns for MCC, MNC, and APN Name. There are four rows for adding APNs, each with input fields for these three fields. An 'OK' button is located at the bottom right of the table.

MCC	MNC	APN Name

OK

Item	Subordinate Item	Description
APN Settings	MCC	Mobile Country Code
	MNC	Mobile Network Code
	APN Name	The APN name used to access the LTE network.

- The changed APN settings take effect after a reboot.

■ LoRa Setting

「 LoRa > LoRa Setting 」

Provides device's LoRa Activation Setting.

The screenshot shows the IML C6400W web interface. The top navigation bar includes Summary, WiFi Settings, LTE, LoRa (selected), Device Settings, and Upgrade. The left sidebar shows user information (user Welcome., Logout) and status indicators (0/1, 100%, LoRa). The main content area is titled 'LoRa Setting' and contains two sections: 'Activation Mode Setting' with a dropdown menu set to 'OTAA', and 'Activation Info Setting' with input fields for Device EUI (0080E115051FD8EB), Application EUI (F000000000000001), Application Key (F0000000000000000000000000000001), Device Address (F0000001), Application Session Key (F0000000000000000000000000000001), and Network Session Key (F0000000000000000000000000000001). A 'Save' button is located at the bottom of the settings area.

- Activation Mode Setting
 - Change the setting of the device's LoRa Activation Mode ('OTAA' or 'ABP').

Item	Subordinate Item	Description
Activation Mode Setting	Activation Mode	Activation mode setting.
Activation Info Setting	Device EUI	Device classification. Requires pre-provisioning of N/W server and device when operation.
	Application EUI	Service division. Requires pre-provisioning for N/W server and device when opening operation.
	Application Key	Main Root-Key for Encryption/Decryption Key Generation.
	Device Address	Assigned to LoRa device during the opening call processing procedure.
	Application Session Key	Key value for encrypting and decrypting application data in device and N/W server.
	Network Session Key	Key value for encrypting and decrypting application data and checking data integrity in device and N/W server.

■ Device Settings

Provides device's IP lease status, Auto Power Saving Setup, Web Password Setup, Factory Reset, USB Tethering Setup.

The screenshot displays the IML C6400W web interface. The sidebar on the left shows the user 'user' with a 'Welcome.' message and a 'Logout' button. Below this are three status icons: '0 / 1', '100%', and 'LTE'. The main content area has a top navigation bar with tabs: 'Summary', 'WiFi Settings', 'LTE', 'LoRa', 'Device Settings' (selected), and 'Upgrade'. A teal 'Upgrade' button is also present. The 'Device Settings' section is expanded, showing a breadcrumb trail '* Device Settings > Device Settings'. It contains five sub-sections: 1. 'IP Lease Status' with a table showing columns for Name, MAC Address, IP Address, and Remaining Lease Duration. 2. 'Auto power saving setting' with a dropdown menu set to 'Deactive' and an 'Apply' button. 3. 'Change Password' with three input fields for 'Current Login Password', 'New Login Password', and 'Confirm New Login Password', followed by a 'Save' button. 4. 'Reset Settings' with a dropdown menu set to 'Factory Reset(Default Setting)' and an 'Apply' button. 5. 'USB Tethering' with a dropdown menu set to 'Deactive' and an 'Apply' button.

- IP Lease Status
 - The client connected to the MiFi (IML-C6400W) currently is shown.
- Auto power saving setting
 - Automatic power saving time setting.
- Change Password
 - Please enter your current password.
 - Type in new password to use from now on.
 - Type in the same password twice to confirm the new password and then click on 'Save' Button.
- Reset Settings
 - Reset to the default configuration. The device will restart when the factory reset button is selected.
- USB Tethering

- USB Tethering can be set to 'Active' or 'Deactive'.

■ Upgrade

System can be updated by firmware files downloaded from the manufacturer's homepage. System shall be rebooted after updating.

The screenshot shows the IML C6400W web interface. The sidebar on the left includes a user welcome message, a logout button, and status indicators for LTE (0/1), 100%, and LoRa. The main content area has tabs for Summary, WiFi Settings, LTE, LoRa, Device Settings, and Upgrade. The Upgrade tab is selected, showing a breadcrumb trail 'Upgrade > Upgrade'. Under 'Firmware Information', there is a table with the following data:

Software Version	0106
LTE Firmware Version	0.3.04.1
LoRa Firmware Version	1.0.0

Below the table, the 'Upgrade' section contains three instructions:

- > The MiFi will be reboot after upgrade.
- > During the upgrade, you should not turn off the power or turn off the WiFi connection.
- > The upgrade will be stopped, the move to another menu during the upgrade.

At the bottom, there is a 'Firmware File' section with a search input field and an 'Apply' button.

■ Firmware Information

- Shows the current software version for MiFi device, including the LTE and LoRa firmware version.

■ Upgrade

- ① Download the latest version into your computer.
- ② Select the file downloaded in the file selection window, and click the 'Search..' button.
- ③ Click the 'Apply' button, then update will start.
- ④ Software update takes about 3 minutes, and the device will restart after finishing the update.

Do not move to other menu in the web site, disconnect, or turn off power. Malfunction may result.
The device may malfunction if the wrong firmware file is applied.

10. Troubleshooting Guide

1. Unable to connect to the network

- Check the power of the MiFi device
 - If there is no light on the LED, press & hold the Power button for 3 seconds to turn on the Mifi device.
- Check the network signal strength through the LTE/LoRa signal strength LED.
- Reboot the MiFi device.

2. How to Factory Reset MiFi

- Initialize the MiFi settings
 - If you have changed your Login Password and forgotten it, reset your MiFi device to the factory default settings as follows.
 - **1) Initialization method using buttons**
 - Press & hold Power button and LTE/LoRa button for about 10 seconds at Power on state.
 - **2) Initialization method using Web Portal**
 - After logging in to the Web Portal → Click [Device Settings] menu → Click [Factory Reset(Default Setting)] - [Apply] button.

Note: LoRa setting is initialized after factory reset. Please contact the Administrator for the LoRa settings.

11. Product Specification

Model Name		IML-C6400W
Product Name		LTE Mobile WiFi
FCC ID		YCO-IML-C6400W
LTE	Standard	3GPP E-UTRA LTE-FDD UE Category 4
	Frequency	B26
Size / Weight		61x91x15mm / 105±5g
Battery Capacity		3300mAh
Charging Current Rating		DC 5V 2A
Charging Time		3 Hr 30m
Charging Temperature		0 ~ +45°C
Operating Temperature		-20 ~ +60°C
Manufacturer / Made in		Infomark Co., Ltd. / Republic of KOREA
Manufacturing Date		Refer to product label

For Safe and Proper Use

The followings are compliance matter in order to prevent hazard on the user or other persons or property damage and safely and properly use this product.

- ※ It includes matters on the main body, accessory AC Adaptor.
- ※ We are not responsible for any problems if unapproved accessories are used.
These basic accessories are subject to change without prior notice.

■ **Danger**

A serious or fatal injury may result if instructions are not followed.

It may cause heating, explosion or ignition.

- For charging, never use other chargers other than the standard charger provided.
- Do not make short circuit of battery terminals, expose the product to fire or water,

disassemble or modify it.

■ **Warning**

A serious or fatal injury may result if instructions are not followed.

If the product generates abnormal sounds, a burning smell or smoke, disconnect the power cord immediately and contact the Administrator. A fire or electric shock may result.

Do not submerge or wet this product in the water, etc. When using it outdoor, be careful not to make it wet with rain, etc. If any water permeates into the product, promptly turn OFF power of it. If it continues to be used, it may cause fire, electric shock or fault.

Do not place objects containing liquid (vases, pots, bottles, etc) or metallic objects on top of the product.

- Be sure to power off the product and disconnect the power cord when water or other foreign substances have entered the product. Contact the Administrator.
- Product failure, an electric shock or fire may result.

Do not drop objects on the product or apply impact.

- A fire, electric shock may result.

There is a high voltage inside the product. Never disassemble, modify or repair the product yourself.

- A fire or electric shock may result.
- Contact your Administrator for repairs.

Do not handle the product with wet hands. Otherwise, an electric shock may result.

When mounting any implantable pacemaker or implantable cardioverter-defibrillator (ICD), carry and use the product away from mount 22cm or more. Radio wave may have effect on operation of the implantable pacemaker or implantable cardioverter-defibrillator (ICD).

When inside the medical facilities, please use this product complying the followings:

- Do not carry this product into the operation room, intensive care unit (ICU), or coronary care unit (CCU).
 - Within the ward, please turn OFF the product. Even on the lobby, etc. where medical instruments exist, please turn OFF the product.
-

- In areas of prohibited use or carriage, please follow instructions from each medical institute.

In areas where the use of wireless equipment is restricted e.g. within airplane or hospital, etc., please turn OFF the product.

- Accidents may result due to possible effect on the electronic appliance or medical instrument.

If it may have effect on the automatic control equipment such as automobile, elevator or automatic door, etc., please turn OFF power of this product promptly.

It may obstruct safe running or safe progress.

Do not keep containers with fluid such as flower vase, flower pot, cup, cosmetics, medicine, water, etc. or small metal piece near this product. Content spills to contact this product or enters into this product, please turn OFF power of this product promptly.

- A fire, electric shock or fault may result if the product continues to be used.

Do not use or keep this product on the places with high humidity such as within bathroom, around humidifier, etc.

It may cause fire, electric shock or fault.

Pay attention not to allow a child to handle with this product. If a child enters this product in the mouth, it may cause suffocation.

■ **Caution**

A serious or fatal injury may result if instructions are not followed.

Do not expose the product to direct sunlight, heat, or a hot object such as a stove.

- The product lifespan may be reduced or a fire may result.

Do not keep the product in a vehicle or a place exposed to dust, moisture (water drips, etc.), oil, or smoke.

- A fire or electric shock may result.

Do not put the product on unstable places such as swinging base or inclined place, etc. In addition, do not place any heavy object on this product.

- Product failure or personal injury may result

Do not put this product on the places with extreme temperature change such as around refrigerator, heater, etc.

- A fire, electric shock or fault may result.

During a lightning or thunderstorm, power off the product and remove the power cable. When at outdoors, please evacuate to the safe area promptly.

- An electric shock or fire due to lightning may result.

This product may increase temperature even under normal state (during or after using).
Extensive contact or body touch may cause cold burn.

Do not carry this product in the pocket. Any applied force may cause damage or fault.

Depending on physical habitude, paint or metal, etc. used in this product may result in symptoms such as itching or allergy, etc. Please stop using the product promptly and seek medical attention.

Keep this product at -10 to 60°C

Caution on Use

- For safe and proper use of this product, do not use it in the following places.
 - Places with vibration
 - Places where evaporated chemical is stacked or there is direct contact with the chemical
 - Around equipment with strong magnetic field such as microwave, oven or radio, TV, etc.
 - Around electric welding machine or high frequency sewing machine with high frequency noise.
- Do not expose the product to hot temperature or direct sunlight. In addition, do not store or leave it at high temperature such as inside the car, etc. for a long time during the summer, but use it on the place with good ventilation.
- When using this product around TV, radio, wireless phone, etc. and it results in receiving obstruction, etc., please use it away from the equipment.
- Do not clean this product with benzene, thinner, alcohol or detergent, etc. It may cause discoloration, damage or fault. Please clean with soft cloth.
- If the computer turns OFF during communication or this product is disconnected, communication may not operate or data may be damaged. Please check and compare important data with the original data after communication.
- Though this product does not generate much heat, if it becomes too hot to touch with hand, please stop using it promptly and visit the customer support center.

Restrictions on use

- It is a pre-requisite to use this product within the country. It cannot be used in any foreign country.
- It cannot be used in other areas except for WiMAX service areas.
- Where the WiMAX signal is difficult to be transmitted even within the service area (indoor, within a car, underground, within a tunnel, shadow area, mountainous area, etc.), it cannot be connected or communication speed becomes slow. In addition, please note that it may not be used in open area such as high-rise buildings, etc.
- Propagation status or transmission speed of WiMAX may vary depending on building structure, or material, furniture arrangement, moving speed of the user, etc.
- When propagation conditions become worsen under a certain level, communication may be suddenly disconnected. However, even under good propagation conditions, communication may be disconnected.
- Though this product may be available for safe communication using authentication and encryption technology, as it uses RF wave, communication may be monitored by the third party. For safe communication security, please apply the security settings on the computer for use before using this product.
- When using the product in a pocket or a bag for a long time, it may increase heat.

FCC Statements

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) this device may not cause harmful interference, and
 - (2) this device must accept any interference received, including interference that may cause undesired operation.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This device must not be co-located or operating in conjunction with any other antenna or transmitter.
- Your device is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for Radio Frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government.
- The product complies with the FCC portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual.
