Pairing Bryton Smart Speed Sensor with Your ANT+/BLE Devices

After installing Bryton Smart Speed Sensor, rotate wheel a few times to wake Bryton Smart Speed Sensor up. The sensor can only be paired when it is awake, or it would go back to sleep to preserve power.

Note:
1. The pairing steps differ from each Bryton device. Please check its own user manual.
2. Please keep away from other ANT+ or BLE sensors while pairing.

Connecting to Your ANT+/BLE Devices

After pairing, your Bryton devices automatically connect to Bryton Smart Speed Sensor each time when the sensor is awake.
Applicable to radio exempts of licence. The operation of this device is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation.

Industry Canada Compliance

IC Radiation Exposure Statement:

This equipment complies with Industry Canada Standard RSS-310. Ce dispositif de radiocommunication de catégorie II respecte la norme CNR-310 d’Industrie Canada.

IMPORTANT NOTE:

IC Radiation Exposure Statement:

This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

CE Marking Warning

This is a Class B product, in a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

Australian Consumer Law

Our goods come with guarantees that cannot be excluded under the New Zealand and Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods or any consumer item is not of acceptable quality and the failure does not amount to a major failure.

Bryton Inc. warrants its products to be free from defects in materials or workmanship for one year from the date of purchase. Bryton Inc. will repair or replace any component that fails in normal use within this limited warranty period at no charge to the customer for parts or labor.

This warranty does not apply to:
1) Damage caused by misuse, accident, abuse, fire, or other external causes or acts of nature
2) Physical damage to the surface, such as scratches and dents;
3) Consumable parts, such as batteries, heart rate belts, unless it is determined by anyone who is not an authorized service provider of Bryton Inc.

Physical size: 36.9 x 34.8 x 8.1 mm
Weight: 6 g
Water Resistance: Incidental exposure to water of up to 1 meter for up to 30 minutes
Transmission range: 3 m
Battery Life: Up to 1 year
Operating temperature: -10 °C ~ 60 °C
Radio Frequency / Protocol: 2.4GHz / Bluetooth 4.0 and ANT+
Pairing Bryton Smart Cadence Sensor with Your ANT+/BLE Devices

After installing Bryton Smart Cadence Sensor, rotate crank a few times to wake Bryton Smart Cadence Sensor up. The sensor can only be paired when it is awake, or it would go back to sleep to preserve power.

Note:
1. The pairing steps differ from each Bryton device. Please check its own user manual.
2. Please keep away from other ANT+ or BLE sensors while pairing.

Connecting to Your ANT+/BLE Devices

After pairing, your Bryton devices automatically connect to Bryton Smart Cadence Sensor each time when the sensor is awake.

The Smart Cadence sensor contains a user-replaceable CR2032 battery.
