Ref: FCC Class II Permissive change for FCC ID: **YETD24NU** and **YETD24CU**
(Original Grant date: **July 11, 2014**, Applicant: **Nextivity, Inc.**)

Dear Examiner,

This is to request a Class II permissive change for FCC ID: **YETD24NU** and **YETD24CU** originally granted on July 11, 2014.

The major changes filed under this application are:

- Update DFS detection software for the latest KDB requirements on both YETD24NU and YETD24CU. No hardware modifications have been performed.
- Converting 5GHz operation (YETD24CU) under 15.247 to 15.407

Old and New rules along with test procedures were reviewed. Old reports used during initial certification used the applicable KDB procedures and ANSI C63.10 standard and as the product remain unchanged in HW for UNII and reports do not need to be revised in UNII-2C/3. DFS and FCC 15.407 tests are performed to demonstrate compliance.

Software security requirements are included in the operation description.

If you have any questions regarding this application, please feel free to contact me.

Sincerely,

Company Officer: C K Li
Title: Sr. Principle Engineer, Regulatory
