**You can access the full user manual for more information.*

Prior to using the device, fully charge the battery. The device has a built in battery that uses only the supplied charger to charge it.

In order to prolong the service life of the product, use the device until the battery is depleted for the first two times before charging the battery again.

To charge the battery, connect one end of the charger to your wall outlet. Plug the USB cable into the charger and the other end to the device's DC jack.

Note:

When the device is not in use, be sure to turn it off to conserve the battery.

1. Press the Power button to power ON the device. To power ON the device, press and hold the Power button for a few seconds until the startup image appears on the screen.

Slide the lock icon to unlock the tablet.

2. To Power OFF the tablet, press and hold the Power button for a few seconds, then a "Power OFF" dialog box will pop up.

Select "OK" to power OFF your tablet.

3. When the tablet is already powered ON, tap the power button once to put the tablet in sleep mode.
4. When the tablet is in sleep mode, tap the Power button once to wake the tablet.

Slide the lock icon to unlock the tablet.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class C digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

This device complies with Canadian ICES-003 and RSS-210
