Application for Class II Permissive Change (C2PC) - FCC

Dear Sir/Madam:

We respectfully wish to apply for a Class II permissive change (C2PC) for the above referenced FCC Identifier under the provisions of FCC rule [§ 2.1043](#).

The purpose of this application is to add the following features or modifications to the existing initial certification:

1. Add model NXSMP2-DDSO to the certification. The NXSMP2-DDSO shares the same electrical hardware as the models in the original certification except for some non-radio electrical components which are depopulated. These components include a PIR occupancy sensor and the supporting chip resistors and capacitors. The NXSMP2-DDSO also has a slightly different housing cap to optimize the performance of the light sensor on the device. The schematics, bill of materials, and photos detailing these changes are included in the filing for this permissive change.

We affirm that the changes are within the boundaries of the [KDB 178919 D01 Permissive Change Policy v06](#) and do not compromise the compliance of the equipment with applicable FCC rules and regulations. All changes have been thoroughly evaluated and tested to ensure continued compliance. Supporting test reports are included with this application.

We certify that no party to this application is subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988.

Sincerely,

Signature:
