

Class II Permissive Change Application Cover Letter

August 03, 2026

Affected LMA module ID: YJ7-NA230951

Host model number: DCPS966

The LMA module ID YJ7-NA230951 has a limited modular approval because it fulfills all the Modular Transmitter Requirements of FCC Part 15.212(a)(1) except for the shielding requirement. This module does not have its own shielding.

Because of the LMA, all host devices using this module must be evaluated and a Class II Permissive Change (C2PC) application must be filed. The host model number referenced above was evaluated for this C2PC application using the Host Device Testing Guidance in the Integration Manual that is part of the module grant authorization filing. The resulting test data are provided in this application as required by the LMA test plan.

Regards,

Kirwan Magdamo
