(Outside)

#### Using your Wireless Car Charger

1. Unscrew the large socket nut and push vent clip ball joint into the hole until it snaps into place.
2. Screw the socket nut back on until tight – this locks the vent clip onto the wireless charging pad and holds the adjustable support base in place.
3. Insert the USB-A plug into the car charger, then insert the USB-C plug into the wireless car charger.

4. **VENT MOUNT** Attach the mount by placing the vent clip bracket onto an air vent in your car and lock the mount by pressing down on the lever.

**NOTE:** The lever has two settings. 1 is for thin vents, 2 is for thicker vents. If vent clip does not feel secure, adjust setting accordingly.

**SUCTION MOUNT** Attach the suction mount by placing it onto the dashboard or window in your car and lock the mount by pressing down on the lever.

5. Plug the car charger into the cigarette lighter socket to power on. The LED light on the wireless pad will be green when powered on.

6. Place your phone on the charging pad with the bottom of your phone resting on the support base, and the arms will automatically close and hold your phone in place.

**NOTE:** Adjust the support base accordingly to ensure best charging position depending on your device.

7. To remove your phone, touch the button on either side of the mount and the arms will open automatically.

## Specifications

Input: 5VDC/2A; 9VDC/1.67A  
Output: Up to 10W on select devices  
Charging distance: 6mm  
Soft pad to provide a stable surface

Includes:  
Car Wireless Charging Doc,  
Vent Mount and Suction Mount,  
Holder, VPC and cable.

Compatible with all Qi-enabled devices.

### **This device complies with Part 18 of the FCC Rules.**

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

### **CAUTION:**

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

### **Note:**

This equipment has been tested and found to comply with the limits for a wireless power charger, pursuant to Part 18 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be

determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment could be installed and operated with minimum distance 0cm between the radiator and your body. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
