Inquiry on 05/30/2018 :

Inquiry:

Dear Sir/ Madam,

This is an EMC engineer from SGS SZ. My client (Jazwares.LLC) is going to apply certificates (Model: RWB0096). The EUT is a Bluetooth headphone. I knew the KDB 784748 which detailed the rules about the labeling. Please refer to the attached photo. There's not enough space to place the 15.19 statement. Please advise if it is ok to put the statement to user manual and package.

Thanks.

FCC response on 06/01/2018

Please see KDB 784748

[Guidelines for labeling and User Information for RF devices – KDB Publication 784748](#)

2.4 Placement of Compliance Information

Further to Section 2.1077(c), the compliance information must be provided in a form that an end-user can reasonably be expected to have the capability to access, such as the instruction manual, a separate product insert, computer disk, web page, or the device's own electronic screen. Compliance information may be provided electronically as permitted in Section 2.935.

---Reply from Customer on 06/03/2018---

Dear Sir/ Madam,

According to KDB 784748 section A2---When the device is so small, or for such use that it is impracticable to label it with the compliance statement specified in a font that is four-point or larger, and the device does not have a display that can show electronic labeling, then the information required shall be placed in the instruction manual, and on the device packaging or on a removable label attached to the device.

It's acceptable for our client to place the 15.19 statement in manual and packaging. Please correct me if my understanding is wrong.

FCC response on 06/04/2018

Yes that is acceptable.
