

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

**EUT Housing and
Board View 1**

**EUT Housing and
Board View 2**

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'View 1'. The board is rectangular and features a central black rectangular area, likely a display or sensor. It is populated with various electronic components, including resistors, capacitors, and integrated circuits. The board is placed on a blue background, and a black ruler with white markings is positioned vertically to its left and horizontally below it for scale.
Solder Board-Component View 2	 A photograph of the same green PCB component, labeled 'View 2', showing the reverse side. This view reveals the underside of the board, which is populated with various electronic components, including a large integrated circuit, resistors, and capacitors. The board is placed on a blue background, and a black ruler with white markings is positioned vertically to its left and horizontally below it for scale.

Solder Board-Component View 3	 A photograph of a small green printed circuit board (PCB) component, identified as 'View 3'. The component is rectangular with a gold-colored cylindrical connector on one end. It is placed on a blue fabric surface next to a black L-shaped ruler with white millimeter markings. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is positioned near the 10 mm mark on the vertical scale and the 40 mm mark on the horizontal scale.
Solder Board-Component View 4	 A photograph of the same green PCB component, identified as 'View 4'. This view shows the opposite side of the component, which features a red plastic connector on one end and various electronic components like resistors and a small integrated circuit. It is placed on the same blue fabric surface next to the same black L-shaped ruler. The component is positioned near the 10 mm mark on the vertical scale and the 40 mm mark on the horizontal scale.

Solder Board-Component View 5	 A photograph showing the top view of a small electronic component, likely a microphone module, mounted on a green printed circuit board (PCB). The component has a black cylindrical microphone capsule on the left and a black rectangular section on the right. A small green label with the text "MIC JACK" is visible on the right side of the PCB. The component is placed on a blue fabric surface next to a black L-shaped ruler with white markings in millimeters. The ruler indicates the component is approximately 40 mm wide and 20 mm high.
Solder Board-Component View 6	 A photograph showing the bottom view of the same electronic component. The green PCB is visible, showing various electronic components and solder joints. The black cylindrical microphone capsule is still visible on the left. The component is placed on the same blue fabric surface next to the same black L-shaped ruler. The ruler indicates the component is approximately 40 mm wide and 20 mm high.
