Columbia, MD 21046

USA

Date: 29 April 2025

Subject: FCC application - FCC ID: **Z4C-0060**

With reference to the queries raised, please find comment below.

E-Label
This device utilizes E-labelling via LCD. A link to a website is not required or provided. Device packaging (each unit of product) shows how to access regulatory information (E-Label) on the device screen This information is accessed via two steps (three key press).

E-Label Requirements – Per KDB Publication 784748 D02
Section 4.2 4.2 Products must not require special accessories or supplemental plug-ins (e.g., the installation of a SIM/USIM card) to access the information. Instructions must be provided with the product at the time of purchase, in the user manual, operating instructions, packaging material, quick guide pamphlet, etc. Alternatively, a product-related website is permitted, if a reference (URL) to obtain the website information is provided at the time of purchase in the user manual, operating instructions, packaging material, quick guide pamphlet, etc. Access to regulatory information must be provided without special codes, accessories, or permissions beyond the normal security protection to unlock the screen, sign-in page, or overall product access. Following product assembly and insertion of the battery, it is possible, without any security, password of special functions, other than indicated two steps (refer “Label-D40060- r2”), to view the required regulatory information.

Section 4.3

4.3 Readability of Regulatory Information

The FCC ID, warning statements, or other information must be displayed electronically in a manner that is clearly legible without the aid of magnification.⁶

The FCC ID as well as FCC marking is indicated on the device LCD (refer "Label-D40060- r2"). The FCC warning required (refer 15.19(a)(3) is available in the paper instruction manual provided with each device (refer "CONF_4901-0298-8 Compliance Guide Minelab_WEB.pdf") It is not possible to include the warning in text 4pt without negatively affecting the device aesthetics.

Section 4.4

4.4 Regulatory Information must be Secure

Both regulatory information and dedicated exclusive application(s) or script(s) must be secured and implemented in a factory-set-unalterable format.⁷

The regulatory information must be capable of being retrieved and displayed locally, and under the control of the end user in possession of the product.

The method must be secure, such that the application or script ensures that the regulatory information correctly displayed.

This indicated regulatory information is secure and cannot be changed by the user. The only way this information may be changed would be through a complete secure software update package from Minelab, it is not possible to change this information on the device.

Section 4.5

4.5 Physical and Temporary label for Purchasing and Importation

When e-labeling is used, a physical temporary label is also required on the product, or a label on the packaging, at the time of importation, marketing, and sales.⁸ The physical label can be a summary version of the required regulatory information, such that the product can be identified as complying with the FCC's equipment authorization requirements. The information may simply be the FCC ID for products subject to certification.

Products imported that are already packaged for sale and have a physical temporary label will satisfy this requirement. However, for products imported in bulk and not packaged individually, it is acceptable to use a temporary removable adhesive label on the product, or temporary or permanent labels on the shipping packaging or protective bags. Any removable adhesive label shall be of a type intended to survive normal shipping and handling.

This device utilizes E-labelling via LCD.

Device packaging (each unit of product) displays the FCC ID and indicates how to access regulatory information (E-Label) on the device screen (refer "Label-D40060-r2").

Sincerely,

Mark Lawrie
