

Thank you for choosing our smart camera
Getting started is easy.

The diagram illustrates the components included in the security camera system. It consists of six items arranged in two rows. The top row includes a 'Security Camera' (a white dome-shaped camera with a lens and a small display), a 'Bracket (Optional)' (a white L-shaped mounting bracket), and a 'Wall Mount Screw Set (Optional)' (a white box containing three screws). The bottom row includes a 'Power Adapter' (a white rectangular power supply unit with two output cables), a 'USB Cable' (a black cable with a USB-A connector on one end and a USB-B connector on the other), and a 'Quick Start Guide' (a white booklet with a camera icon on the cover).

The technical drawings illustrate the Bearcam robot's components:

- Front View:** Shows the robot's face with labels for the **Lens**, **Light sensor**, **Infrared lights**, **Microphone**, and **MicroSD card**.
- Top View:** Shows the top of the robot's head with a label for the **Speaker**.
- Bottom View:** Shows the base of the robot with labels for the **Reset** button and **Power interface**.
- Mounting Hole:** A separate diagram shows a circular hole for mounting the robot.

Bring the camera and phone within 1 to 3 feet (30 to 100 centimeters) of the router.

Note: Make sure smart phone is connected with your wireless router.
Please note the camera is only working under 2.4G Wi-Fi, not support 5G Wi-Fi.

For the best experience, please download the "Tuya smart" APP to your smartphone from App Store or Google Play, or you can also scan the QR code below, the APP icon will be displayed after installed successfully.

Connect the power to the camera by Micro USB Power Adapter (DC5V/1.5A)

- Press the Reset button for above 5 seconds, then release the button to reset the camera, then the LED light will blink quickly.
- Click "Add Device" or "+" on the right corner to add device; Then click "Security&Sensor" to select "Smart Camera";
- Follow the App's instructions and input the right wifi password; Point the QR code to the camera lens for 15-20cm; Click "HEARD THE BEEP" when you heard "dingding". After processing, it paired successfully.

-

You can place your camera on a shelf or other flat surface, or you can mount it to the wall.

- Fasten the mounting screw into the wall, and then mount the camera from the screw.
- If you're mounting the camera to drywall, be sure the plastic drywall anchors that are provided.

You're done!
Congratulations! Your camera is set up and ready to go.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
