Name of the supplier: Shenzhen Maya Communication Equipment Co., LTD

Supplier address: 202,2nd Floor, Building 1, Guanghui Science Park, No.13, Minqing Road, Longhua District, Shenzhen

**Contact number: 0755-
36517075**

Fax: 0755-82916227

Email: 446080430@qq.com

(Signature of the Supplier)

Responsible person
/ Date

Review / Date

Approval / Date

This admission includes the following: (indispensable)

One, the cover

2. Parameters and specifications

3. Structural size diagram

4. BOM outside

V. Production process flow table

Vi. Certification and test status

Customer Name (Company name): Shenzhen Oni Electronics Co., Ltd

The buyer (customer) determines the result: ☐ qualified ☐ unqualified

Demand (customer) recognition (please return the entire
recognition bookmark after confirmation)

Shenzhen Maya Communication
Equipment Co., LTD

1. Frequband for customer antenna debugging and design

frequen cy	frequency range
WIFI	WIFI :2.4G

drawing of complete machine

Antenna diagram

3. Electric performance

3.1 Description of the test method and the data

implementor name	use
Vector Network Analyzer	S 11/Impedance / Passive Test
Agilent 8960 SP 6010 R & S CMU 200	Mobile phone mobile communication equipment test including GSM, GPRS, EDGE, CDMA2000, 1xEV-DO, TD-SCDMA, WCDMA, and HSDPA
R & S CMW 500 MT 8820C	Containing TD-SCDMA, WCDMA, and HSDPA, LTE, WIFI, GPS mobile phone mobile communication equipment test
Agilent E 4438C	Test for the active GPS
MVG Chamber	Passive Test / OTA active Test / Efficiency /Gain

3.2 Passive Test Report (Passive Test Report)

Test equipment: network analyzer

Test method: use a 50 ohm CABLE cable to export the data from the instrument test port, use the SMA connector of the hand mechanism after the calibration part, and record the data such as echo loss or standing wave ratio corresponding to the relevant frequency point.

Shenzhen Maya Communication Equipment Co., LTD

3.3 Active Test Report (Active Test Report)

TRP /TIS

Test tools: comprehensive tester, network analyzer, full radio far field ETS, The French MVG SG24LT (Satmio) near-field 3D microwave dark chamber, High-precision positioning system and its controller and computer test environment with automatic test program: temperature $22^{\circ}\text{C} \pm 3^{\circ}\text{C}$, Humidity $60\% \pm 15\%$ test method: test method and calculation of TRP of system software during the TRP test, The DUT (Device Under Test) is in the maximum transmitting power state, Select high school, low three channels for testing, Controlling the position of the DUT through the positioning system, With 15 degrees as the step length, Measure the effective radiation power (EIRP) at each point in the three-dimensional space, By integrating the average over the sphere, The calculation formula is as follows:

$$TRP \cong \frac{\pi}{2NM} \sum_{i=1}^{N-1} \sum_{j=0}^{M-1} [EiRP_{\theta}(\theta_i, \phi_j) + EiRP(\theta_i, \phi_j)] \sin(\theta_i)$$

In the TIS test, DUT is in the maximum transmitting power state, and three channels, high and low, are selected for the test. By controlling the position of DUT, measuring the receiving sensitivity of each point in the 3-dimensional space, and calculate the average value on the sphere by integrating. The calculation formula is as follows:

$$TIS \cong \frac{1}{\pi \sum_{i=1}^{N-1} \sum_{j=0}^{M-1} \left[\frac{1}{EIS_{\theta}(\theta_i, \phi_j)} + \frac{1}{EIS_{\phi}(\theta_i, \phi_j)} \right] \sin(\theta_i)}$$

Shenzhen Maya Communication Equipment Co., LTD

3.4 Active OTA TRP / TIS data

CHANNEL	L	M	H	L	M	H
TRP	14.8	15.23	15.72	12.22	13.26	13.82
TIS			-82.66			-70.92

Frequency	Efficiency	Gain . dB
2400000000	42%	2.74
2410000000	42%	2.86
2420000000	43%	3.07
2430000000	44%	3.03
2440000000	45%	2.74
2450000000	45%	2.82
2460000000	47%	2.85
2470000000	48%	2.55
2480000000	48%	2.30
2490000000	48%	2.51
2500000000	50%	2.59

3.5. The passive direction map

4. Matching circuit description

Note: Our company has adjusted the matching circuit of the antenna.

5. Environmental treatment

WiFi Antenna assembly diagram

6. Structural drawings

文件编号:QWRE-3023-433-1A-A

NOTE:
The welding position of the antenna is firm and the cable size is accurate.
Compare with the engineering sample.
Mark ★ as the key dimension. If the tolerance is not indicated.
The general tolerance shall prevail
The finished product must be 100% conduction test OK.
The finished product must be 100% full inspection OK.
Joint tension SMA 3kg, TPEX:1.2KG , solder height ≤2.0
The surface shall be free from oxidation, notch, dirty spot, oil stain, etc.
The wire rod shall be clean and the outer skin shall be free from damage
Adopt environmental protection process
