

Rechargeable 2.4GHz DX-1 MICRO DRONE

GETTING TO KNOW YOUR DRONE

PLEASE READ ALL WARNINGS AND INSTRUCTIONS PRIOR TO USE. KEEP THIS DOCUMENT AS IT CONTAINS IMPORTANT INFORMATION ABOUT YOUR DRONE.

1. CHARGING

- Drone must be charged before each use (USB cable included)
- Indicator light will turn off once fully charged
- Install batteries in remote

2. PAIRING

- Before each flight pair the remote with the drone:
- 1. Turn your drone on and place on a flat, level surface
- 2. Turn on the remote on and move the left joystick down, then up, then down again
- 3. The beep will indicate successful pairing

3. DIRECTIONAL LIGHTS

- White lights indicate the front of the drone
- Red lights indicate the back of the drone
- Not applicable in auto-orientation mode

4. REMOTE CONTROL OVERVIEW

Practice flying your drone below 10 feet and at low speeds until comfortable with all controls to avoid unnecessary damage or injury

- Left joystick:
 - Up/Down controls elevation
 - Left/Right controls spin
 - Right joystick: controls flight direction
 - Directional Lights: use to eliminate drift
- To cut power to drone, move left joystick to position

Rechargeable 2.4GHz DX-1 MICRO DRONE

INTRODUCTION

Congratulations on your purchase of the Sharper Image Rechargeable 2.4 GHz DX-1 Micro Drone. Get ready to soar to new heights. Master the art of drone flying with remote control maneuverability. This lightweight micro drone will provide hours of fun.

SPECIFICATIONS

Drone Battery: 100-mAh Li-Po
Remote Controller Battery: 2 x 1.5V AAA
Charging Time: Approximately 30 minutes
Maximum Recommended Altitude 65 ft.

READ ALL WARNINGS AND PRECAUTIONS BEFORE USE

SAFETY WARNINGS:

- Not recommended for children under 12 years of age. As with all electrical products, precaution should be observed during handling and use to reduce the risk of electrical shock.
- Adult supervision is required at all times.
- Before each use, an adult should review the product and battery to determine that no damage or hazards exist.
- **DO NOT TOUCH SPINNING PROPELLERS**
 - Do not allow anything to intentionally make contact in any way with spinning propellers.
 - Prevent contact with spinning blades by turning off remote prior to handling drone.
- Use caution and pay attention to your surroundings while operating drone.
- Do not fly drone into animals, people, or inanimate objects.
- Keep drone away from power lines, buildings, trees, public areas, and any other potentially hazardous areas.
- Do not operate in rain, heavy wind, or any type of severe weather.
- Do not land drone on wet surfaces.
- Never touch or allow others to touch drone while it is flying.
- Always turn drone off when it is not in use.
- Always fly drone in large open areas.
- Never fly drones above or near people, sudden changes in wind or other conditions could lead to unexpected crashes.
- Always use caution when flying drone vehicles, obey relevant laws, respect the privacy and property rights of others.
- This drone shall never be modified or used for anything except its intended purpose.

CONTENTS

REMOTE BATTERY INFORMATION

1. Slide open battery compartment.
2. Install "AAA" batteries as shown in diagram shown above.
3. Replace and close battery compartment.

LITHIUM-POLYMER BATTERY WARNING

- There is a risk of fire and personal injury if Li-Po battery is purchased, damaged or misused.
- Never expose battery to extreme temperatures or moisture.
- Do not subject battery to strong impacts.
- Always keep battery away from flammable materials.
- Only use manufacturer specified batteries, chargers, and/or adapters, if applicable, specified by the manufacturer.
- Battery is not serviceable.
- Let battery cool to room temperature before charging.
- While charging, never leave battery unattended, alone and local laws.
- Recycle or dispose of battery according to federal, state and local laws.

BATTERY WARNING

Do not use alternate, inferior, counterfeit, or incompatible batteries. These batteries may be damaged or destroyed. Do not use any battery that is not properly labeled, marked, or certified by the manufacturer. Always use proper care and handling of batteries before and after each use.

KEEP THIS INSTRUCTION MANUAL FOR REFERENCE

CHARGING BATTERY

Note: The Battery Charger will light up when it is charging the battery and will turn off when the battery is fully charged. Charge time is approximately 30 minutes.

Turn off the drone before charging.

Carefully connect the Drone to USB charging cord as the connector. Connector is delicate and must be handled with care.

Connect USB connector to power source.

Please note the plug direction when plugging in the drone.

Drone can be charged and stored inside of controller:

BLADE GUARD INSTALLATION

Blade guards should be installed prior to flying the drone. The blade guards will help protect your drone and bystanders from the spinning propellers. They will protect the propellers if the drone is dropped or has a rough landing. The blade guards will also allow you to see the drone while it is in flight. Please see below on how to properly install the blade guards.

BEFORE INSTALLATION:

Identify the number on the blade guard and match it to the number on the Drone.

Carefully align the propeller so it is horizontal to the leg of the Drone.

Coming from below, angle the blade guard to the propeller post.

Carefully close the blade guard around the propeller post. Press down on the base until it clicks.

REMOTE CONTROL OVERVIEW

Page 5

Rechargeable 2.4GHz DX-1 MICRO DRONE

OPERATING DRONE

Step 1 - Pre Flight Checklist

1. Read all warnings and instructions
2. Install remote batteries, page 2
3. Make sure that drone and remote are powered off
4. Charge batteries, page 3.

Step 2 - Choosing a location

- Drone is designed to be flown indoors only
- Always make sure you have enough space to fly drone
- Always follow warnings, page 1

Step 3 - Starting Drone

1. Making sure your remote is off, slide down switch to ON. Drone lights will begin to flicker
2. Choose a flat even surface and follow the diagram
3. Turn remote on. Bring the Throttle all the way up then bring it all the way down. Remote will beep and drone lights will flicker rapidly then turn on permanently once paired.
4. Drone is ready for flight.

Step 4 - Lift Off

- 1. Slowly and carefully bring the throttle up. Propellers will begin to spin and drone will begin to elevate. You can compensate for some of the drone drifting by using the Multi Directional Button or by following step 5. You may need to practice this step several times before successfully getting drone into the air.

Step 5 - Drone Begins to Drift

- Follow this step if your drone begins to drift while take off or during flight
- Drone drifts backwards: Slide the Forward/Backwards Adjustment up
- Drone drifts forwards: Slide the Forward/Backwards Adjustment down
- Drone drifts left: Slide the Side to Side Adjustment to the right
- Drone drifts right: Slide the Side to Side Adjustment to the left
- Drone spins clockwise (viewing drone from top): Slide the Spin Adjustment to the left
- Drone spins counter-clockwise (viewing drone from top): Slide the Spin Adjustment to the right

Always turn off remote prior to retrieving or picking up drone. This will help you avoid accidentally activating propellers.

Step 6 - Operating Drone in Flight

The drone range is approximately 100 feet

- Read and be aware of all warnings found on page 1
- Maintain your desired elevation by using the Throttle
- Use the Throttle Joystick in a circle motion to spin the drone
- Use the Multi Directional Joystick to move forwards, backwards, and side to side
- Repeat step 5 if your drone begins to drift

Page 6

MODES

Auto Landing

Make sure you have achieved level, balanced flight, where the drone is neither climbing nor descending. This mode will activate when the remote loses signal or when remote is turned off or when battery gets too low.

The ideal auto landing height is 10ft.

This mode allows you to safely and slowly land your drone without having to control the speed. It is done for you automatically.

This mode allows you to safely and slowly land your drone without having to control the speed. It is done for you automatically.

This mode allows you to safely and slowly land your drone without having to control the speed. It is done for you automatically.
