Wireless Charger

Model: WS0213B

Qi2 Certified

Certification program ensures this charger has passed rigorous tests to guarantee safety, compatibility and energy efficiency.

Features

- Charge your Qi2-enabled wireless charging phone
- Magnetically charge an iPhone 15/14/13 or 12 series
- Qi2 and MagSafe compatibility ensures perfect alignment of your iPhone for optimum every time
- Supports 15W wireless fast charging for compatible phones
- Fixed 1.5m USB-C cable to connect to a USB-C wall charger (USB-C wall charger not included)
- Works with Qi2 and MagSafe compatible cases
- Full safety protection with temperature control, voltage regulation and short circuit protection

Wireless Charger Operation

- Connect the USB-C cable to a USB-C wall charger (not included)
- Place your iPhone onto the magnetic charging pad and the magnets will perfectly align for optimum wireless charging
- Your phone should automatically start charging
- To remove your phone, simply pull the magnetic charging pad away from your phone

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions : (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment shall be installed and operated with minimum distance 20cm between the radiator & body.
