Setting Up Your Foscam Security Camera

1 Getting Started

Package Contents

Safety Tips

- Please change the camera's password regularly, using a combination of numbers, letters and special characters.
- We recommend that you regularly update your camera with the latest available software and firmware to ensure the best experience with your camera.

- Please ensure that the proper power supply is used before using the camera.
- Do not use the device where wireless devices are not allowed.
- Do not disassemble, repair or modify the product.
- Do not use the product if the casing has been broken. Danger of electric shock.
- Please install the camera securely using the screws provided.
- Change your default port to a greater range to help ensure the safety of your connection.
- To avoid the risk of fire or electric shock, please keep your camera connectors in a cool, dry place.
- Please keep the camera out of reach of small children.
- Operating Temperature: -20°C ~50°C (-4°F ~122°F).

2 Physical Description

3 Setting Up Your Camera: Wired Connection via the Foscam App (Recommended)

Before You Get Started

Scan the QR code below to download and install the Foscam APP.

To ensure a smoother video experience on your smart phone, it is recommended that your smart phone meet the following specifications:

- iOS: version 11 or higher.
- Android: 5.0 or higher, using a device with a Graphics Processing Unit (GPU).

Note: For the best experience, please update the APP to the latest version!

Wired Connection

1. Please tighten the antenna clockwise and make sure it is in a vertical position.

2. Connect the camera to your router with an Ethernet cable.
3. Plug the power adapter into the camera, and then wait for about 1 minute.
4. Make sure your smart phone is connected to the same WiFi network as the camera.

Tips: The camera supports dual-band 2.4GHz and 5GHz WiFi networks, so you can choose the channel with the stronger signal to use. For example, choose your SSID: XXXXX_2.4G or XXXXX_5G.

5. Open the Foscam APP and please register a Foscam account, or sign in if you have one already.

6. Follow the steps below:

Note: If the adding process fails, please reset your camera and try adding again according to the above method.

■ Configure WiFi

If you selected "Skip" in ⑩, click play to enter the camera credentials interface > Tap the "⊗" button > tap "WiFi Settings" > select your WiFi network and enter your WiFi's password. After setting up successfully, you can view live video without the Ethernet cable.

4 PC Access Your Camera

■ Foscama VMS

Foscama VMS is a new tool for PCs. It does not require plug-ins and is compatible with Windows & Mac, supporting all Foscama HD cameras and up to 36 cameras at the same time. If you would like to manage multiple cameras, we suggest you install Foscama VMS. You can download the "Foscama VMS" Windows version from foscama.com/vms and can download the "Foscama VMS" Mac version from the APP store:

<https://apps.apple.com/cn/app/foscama-vms/id1521202507?mt=12>

Note: For the best experience, please update Foscama VMS to the latest version!

Add the IP Camera

1. Run Foscama VMS, then create a local administrator account and login.
2. Tap the "+" icon on the Foscama VMS and follow the setup wizard to add your camera.

Please visit foscama.com/downloads to view the user manual and for additional detailed steps.

5 Hardware Installation

SD Card Installation (Optional)

1. Loosen the cover of the device by rotating it counter-clockwise, and remove the cover.
2. Insert a micro SD into the SD card slot.

3. Fasten the cover by rotating it clockwise. If you don't want to use an SD card for storage, you can choose not to install the SD card (in that case, steps 1-3 can be ignored and you can begin installation with step 4 below).

Camera Mounting

4. Install the mounting plate in the area to be monitored.

Note: for the best visuals, we suggest mounting the camera in a position that is at least 30cm (11.8in) away from the left and right walls.

5. Loosen the anti-theft screw on the mounting plate, and then rotate it
6. Install the mounting plate on a wall or ceiling with the provided fixing screws.

7. Align points a and b to insert the camera base into the mounting plate. Rotate so that points a and b are no longer aligned: this attaches the camera securely to the base. After installing the camera on the mounting plate, then tighten the screw on the mounting plate to prevent theft.

8. Wiring

- a. Pass the wire out from the gap of the mounting plate.
- b. Connect the camera to your LAN (Local Area Network or Internet router) via Ethernet cable.
- c. Power on the device.

9. Control the angle of the lens in the Foscama app.

6 Important Notice

■ Camera Username & Password

The camera username & password are used to access and manage your camera. Having a strong password can significantly improve the security of your camera. If you have forgotten either of them, please press the "Reset" button.

Press and hold the "Reset" button for 3-5 seconds until hearing "reset succeed".

■ Storage Media

Your camera supports cloud, NVR (Network Video Recorder), and Micro SD card (supports FAT32 and exFAT format) storage formats.

7 Product Performance

WLAN frequency range: 2412MHz - 2472MHz and 5725MHz - 5875MHz
Maximum transmission power: < 18.5dBm
Wireless Standard: IEEE802.11b/g/n (2.4GHz) IEEE802.11a/n/ac (5GHz)
Power Supply: DC 12V 2.0A 24W

8 Troubleshooting

■ IP cameras is not powering on

- If you find your camera is not powering on, please the following:
1. Please check whether the outlet is working properly or not. Try to plug the camera into a different outlet and see whether it will work.
 2. Please check whether the DC adapter is working or not. If you have another 12V/2A power adapter which is working, please try with another power adapter and see whether it will work.
 3. If it still won't work, please contact Foscama support.

■ How to re-configure the WiFi connection for Foscama cameras after router changed?

1. Please connect the camera to your router with an ethernet cable. If you can see the camera live video on the Foscama app, please go to camera settings-->WiFi settings to choose the new WiFi name and input WiFi password to set up. After the WiFi settings is completed, please disconnect the ethernet cable from the camera and wait for some seconds to connect to the camera.
2. There is a need to reset the camera first. Please refer to <https://www.foscama.com/faqs/view.html?id=13> to see the reset steps. Then please open the Foscama app to scan the QR-code of your camera to set up the wireless connection for the camera. Please make sure your cellphone is connected to that new WiFi.

Warning

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

FCC Statement

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
