Re: Confidentiality Request

FCC ID: ZOQAT510

Pursuant to [47 CFR 0.457\(d\)\(1\)\(iii\)](#) and [47 CFR 0.459](#) of the Commission's Rules, and consistent with 5 U.S.C. § 552(b)(4), **Verizon Connect** hereby requests permanent confidential treatment of the non-public technical and commercial information accompanying this application, as outlined below:

- *Exhibit 4: Block Diagram*
- *Exhibit 5: Schematics & PCB Layout*
- *Exhibit 10: Information required for Certification of Equipment (other than that operating under FCC 47 CFR 15, and FCC 47 CFR 18), including Tune up procedure*
- *Exhibit 12: Operating Description*
- *Exhibit 12A: Antenna Details*
- *The Bill of Materials & Parts list*
- *The theory of operation*

The information for which permanent confidential treatment is sought consists of non-public technical, engineering, design, and manufacturing information containing trade secrets and proprietary information not customarily released to the public, including circuit design, component selection, radio architecture, operational theory, and tuning methodology. The public disclosure of these materials would likely cause substantial competitive harm by enabling competitors to copy or reverse-engineer design choices, radio implementation, component selection, manufacturing methods, and device architecture without incurring the development costs borne by Verizon Connect. Verizon Connect has taken reasonable measures to prevent unauthorized disclosure of this information, including restricting access to personnel and contractors with a business need to know, and sharing the information externally only where subject to confidentiality obligations. Permanent confidential treatment is justified because the information reflects enduring technical design and manufacturing know-how that would retain competitive value beyond the certification process and beyond the initial product launch

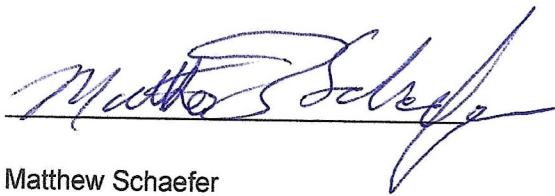

To the extent permitted under the Commission's equipment authorization procedures, Verizon Connect

separately requests short-term confidential treatment for the following launch-sensitive materialism for the maximum permitted short-term confidentiality period (i.e. 180 days after equipment authorisation):

- *Exhibit 2: External Photographs*
- *Exhibit 7: Test Set-up Photographs & Diagrams*
- *Exhibit 8: User Manual*

Verizon Connect understands that pursuant to [47 CFR 0.457\(d\)\(1\)\(ii\)](#), disclosure of this Application and all accompanying materials will not be made before the date of the Grant for this Application.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Matthew Schaefer", written over a horizontal line.
