

16. TestSetup Photos

A photograph showing a yellow liquid-filled head phantom. A yellow measuring tape is placed vertically inside the phantom to measure the liquid depth. The tape shows a reading of approximately 10.5 cm.	A photograph showing a yellow liquid-filled body phantom. A yellow measuring tape is placed vertically inside the phantom to measure the liquid depth. The tape shows a reading of approximately 10.5 cm.
Liquid depth in the head phantom (835MHz)	Liquid depth in the body phantom (835MHz)
A photograph showing a yellow liquid-filled head phantom. A yellow measuring tape is placed vertically inside the phantom to measure the liquid depth. The tape shows a reading of approximately 10.5 cm.	A photograph showing a yellow liquid-filled body phantom. A yellow measuring tape is placed vertically inside the phantom to measure the liquid depth. The tape shows a reading of approximately 10.5 cm.
Liquid depth in the head phantom (1750MHz)	Liquid depth in the body phantom (1750MHz)
A photograph showing a yellow liquid-filled head phantom. A yellow measuring tape is placed vertically inside the phantom to measure the liquid depth. The tape shows a reading of approximately 10.5 cm.	A photograph showing a yellow liquid-filled body phantom. A yellow measuring tape is placed vertically inside the phantom to measure the liquid depth. The tape shows a reading of approximately 10.5 cm.
Liquid depth in the head phantom (1900MHz)	Liquid depth in the body phantom (1900MHz)

Liquid depth in the head phantom (2450MHz)

Liquid depth in the body phantom (2450MHz)

Liquid depth in the head phantom (2600MHz)

Liquid depth in the body phantom (2600MHz)

17. External and Internal Photos of the EUT
