

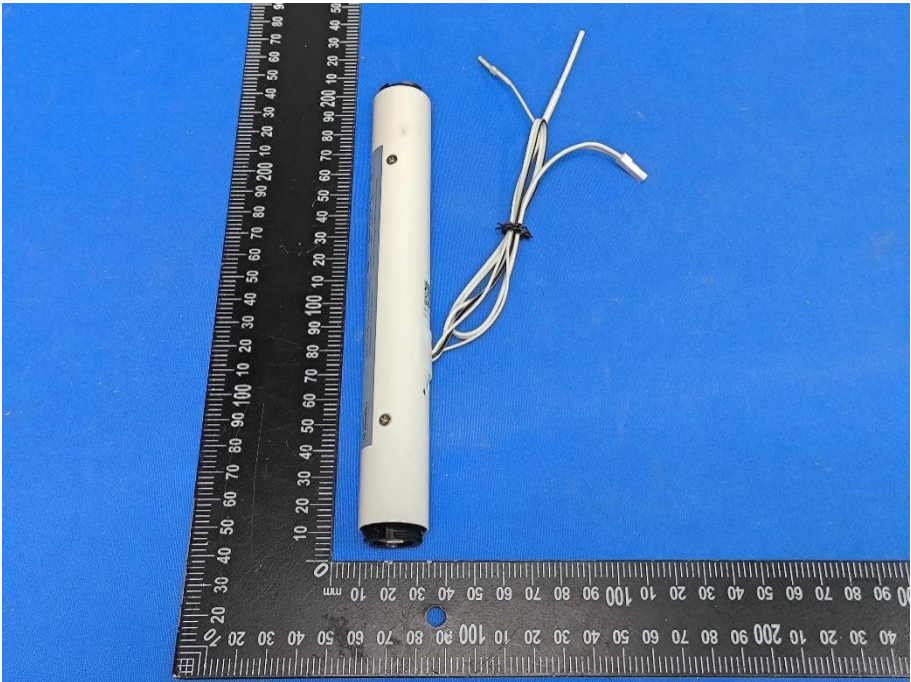

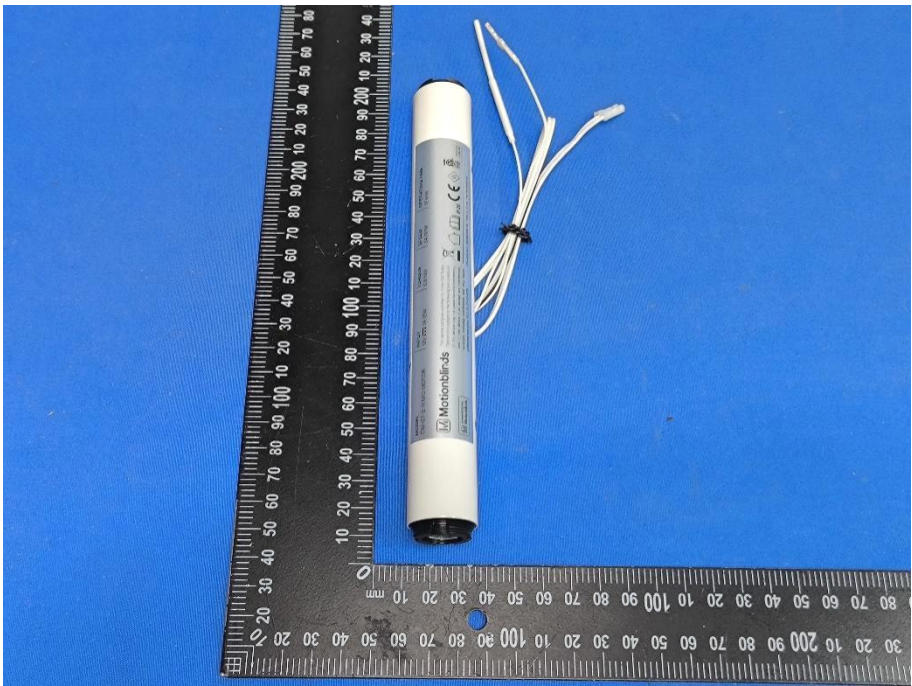

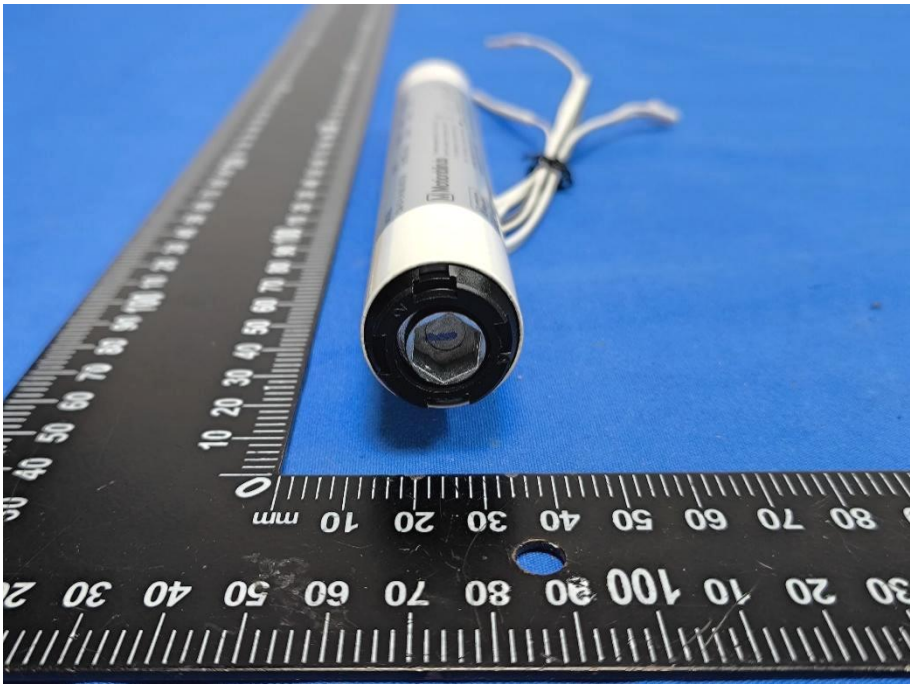

EXHIBIT 2 - EUT EXTERNAL PHOTOGRAPHS

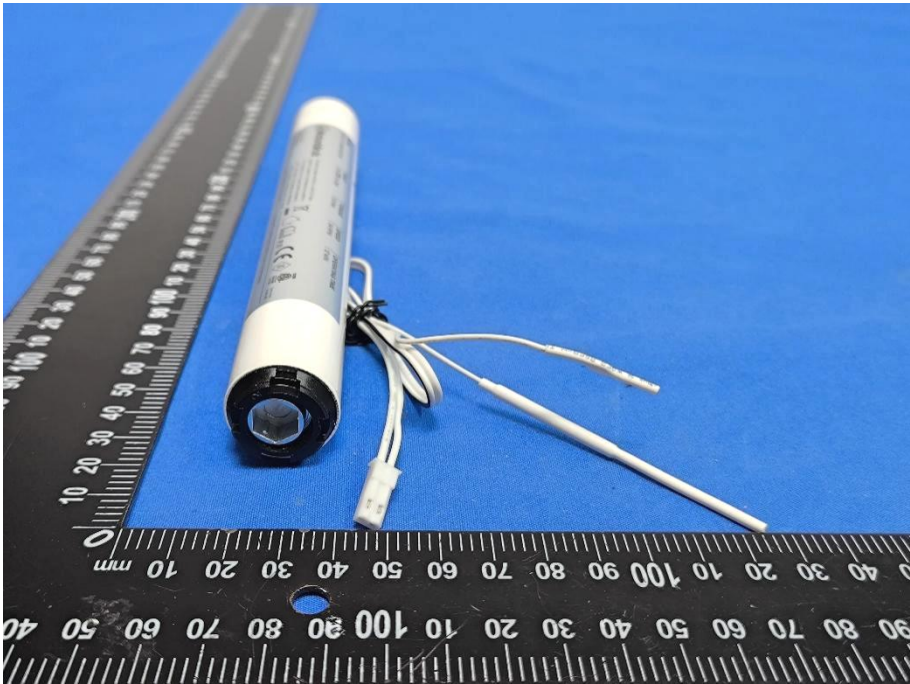

EUT View 1	 A photograph of a white cylindrical device, likely a probe or sensor, with a black cap at one end. A white cable is attached to the side of the cylinder. The device is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, showing measurements in centimeters and millimeters. The device is approximately 10 cm long.
EUT View 2	 A photograph of the same white cylindrical device from a different angle. The device is oriented vertically, showing the black cap at the bottom and the white cable extending upwards. The device is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, showing measurements in centimeters and millimeters. The device is approximately 10 cm long.

EUT View 3	 A photograph showing a white cylindrical device (EUT) with a label and a cable. The device is placed next to a ruler on a blue background. The label on the device includes the text "Motionblinds" and "CE". The cable is white and has a black connector.
EUT View 4	 A photograph showing the same white cylindrical device (EUT) from a different angle. The device is placed next to a ruler on a blue background. The label on the device includes the text "Motionblinds" and "CE". The cable is white and has a black connector.
