

LET US KNOW WHAT YOU THINK

We sincerely thank you for your business and are committed to ensuring your full satisfaction. If you are not entirely satisfied for whatever reason, please reach out to us and we will do all within our power to make it right.

As a young and growing company, it would mean the world to us if you could leave an honest online review about our product and services.

If your experience has been something less than amazing, please drop us an email at support@amcrest.com or give us a ring at 1-888-212-7538

FCC COMPLIANCE STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
2. The user manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. In cases where the manual is provided only in a form other than paper, such as on a computer disk or over the Internet, the information required by this section may be included in the manual in that alternative form, provided the user can reasonably be expected to have the capability to access information in that form.
3. (a) For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.
4. RF exposure warning: This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

ALTERNATIVE ACCESS METHODS

For additional access methods, refer to the alternative access method provided below.

1 CLOUD DESKTOP SETUP

This desktop method will be used for setting up your camera on the cloud via a web browser on a PC or laptop. For more information on cloud desktop setup, visit amcrest.com/cloudwebsetup

2 ADDING ALREADY SETUP CAMERAS

The P2P setup method will be used for setting up already connected devices to the Amcrest View Pro app. For more information on P2P setup, visit amcrest.com/p2psetup

3 IP/DOMAIN/DNS SETUP

The P2P/DNS setup method will be used to establish a direct connection without using P2P. For more information on IP/DNS setup, visit amcrest.com/ipdomaindnssetup

TROUBLESHOOTING/FAQ

HOW DO I ADD ADDITIONAL CAMERAS TO MY CLOUD ACCOUNT?

If you are on a free trial version of Amcrest Cloud and would like to add an additional camera to your cloud account, you will first need to upgrade your cloud account to a premium plan. For more information on upgrading your cloud and adding cameras, visit amcrest.com/cloud

If you are already on a premium cloud plan and would like to proceed with adding another camera to your account, log into your account on the Amcrest Cloud app or PC/Mac. To add a camera, tap on the (+) icon in the main menu, tap on **Add Camera**, and follow the setup prompts.

To add an additional camera to your cloud account on a PC or Mac, log into your account and click on the menu (≡) icon, select **Add Camera**, and follow the setup procedures listed in this menu. For more information on how to add additional cameras on your cloud account, visit amcrest.com/addadditionalcameras

WHY AM I UNABLE TO LOCATE AN SSID?

Android users using 5.0 and above may experience this issue if location permissions are not enabled or are denied by the user when using the app. Android has implemented this feature to increase the overall security of your Wi-Fi connection as well as provide an added layer of protection for your mobile device.

To locate an SSID, during WiFi setup on the Amcrest Cloud app, tap on **Scan** in the Ethernet WiFi Setup menu. A dialog box will appear prompting you to enable location permissions. Tap on **OK** to enable this feature and allow the app to scan for your WiFi network. Your SSID will appear. Select the WiFi network you would like to connect with and enter the WiFi password for your network.

If you are using the Amcrest View Pro app, you must enable location permissions to configure the SSID to your app. When you have enabled location permissions the SSID will show (greyed out) in the WiFi configuration menu where you can enter the WiFi password for your network. For more information on how to locate an SSID on your mobile device, visit amcrest.com/androidip

I'VE LOCKED MYSELF OUT OF THE CAMERA ACCIDENTALLY.

As a security precaution, your Amcrest camera will lock out any user who tries to log in with the wrong password after a handful of consecutive attempts. If you find that you have accidentally locked yourself out, you can wait 5 minutes to log back in or you can power cycle the camera by unplugging and replugging the camera's power cable.

If you have forgotten your password entirely, you can hard factory reset the camera by pressing and holding the reset button down for 45 seconds. The reset button will either be on the back or on the underside of the camera. For more information on hard factory reset procedures for your device, visit amcrest.com/support

Android users using 5.0 and above may experience this issue if location permissions are not enabled or are denied by the user when using the app. Android has implemented this feature to increase the overall security of your Wi-Fi connection as well as provide an added layer of protection for your mobile device.

Start the cloud setup on the Amcrest Cloud app by tapping on the (+) icon in the main menu. At the camera selection screen, tap on the **Enter Camera SN** (serial number) field. Press **Next** to continue. The camera's serial number will be automatically detected that a new camera is being added. Tap on **OK** to continue.

If you already have a set password for your camera, enter the username and password, press **Next**, and tap to skip to the next screen.

8

6

Give the camera a name (e.g., Garage, Living Room, Kitchen, etc.) and tap **Next** to continue.

6

Tap on **Add Camera**.

5

6

33

5

30

26

HOW DO I SETUP MOTION DETECTION/PUSH NOTIFICATIONS FOR MY CAMERA?

By default, the Amcrest Cloud app will automatically send push notifications of a motion detected event, however, if you want to receive additional motion detection events from the Amcrest View Pro app you will need to make these configurations manually.

To setup push notifications on the Amcrest View Pro app, tap on the menu (☰) icon and tap **Push Notifications**. Next, select **Configuration** from the push notifications menu. Tap on the camera you wish to enable and toggle the push notification toggle switch to the 'on' position. When set, tap on **Motion Detect** to enable the camera for motion detection. When finished, tap on the **Save** icon to save the settings to your device. For more information on how to setup push notifications, visit amcrest.com/pushnotifications

HOW DO I CHANGE MY VIDEO STREAM RESOLUTION?

On the Amcrest Cloud app, locate the camera you wish to modify and tap the **settings** (⚙️) icon. In the settings menu, tap on **"Quality"** and change the resolution accordingly. When the resolution has been changed successfully, tap the **Save** button in the upper left-hand corner to save your settings.

On the Amcrest View app, for efficiency purposes, the live stream is set by default to standard resolution (not HD). To enable HD, tap the resolution (📺) icon and then tap on the pencil icon next to HD. After setting the resolution, tap on **OK** ✓ to confirm your settings.

31

To sign up for an Amcrest Cloud account, enter your name, and choose a username and password for the cloud account. Enter the password again into the **Confirm password** section. Next, enter your email address. This will be the email address that will be associated with your cloud account. Enter the same email address into the **Confirm email address** section and press the **Sign Up** button when you are done.

Accept the terms of use for the account. To view the terms of use, click on **View Terms**. Tap on **Agree** to accept the terms of use and proceed with Amcrest Cloud setup.

4

SETUP YOUR CAMERA WITH AMCREST CLOUD

AMCREST CLOUD MOBILE SETUP

Setup procedure for adding a new camera to Amcrest Cloud.

- Before starting, it is recommended to reset your camera. Simply unplug the power source and plug it back in.
- Please make sure your camera is plugged into a power source and an Ethernet cable is connected from the camera to your router. The Ethernet cable can be removed after setup.
- Make sure your camera and mobile device are on the same network during setup.

Download and open the Amcrest Cloud app from the App Store or Play Store.

Once you have downloaded the Amcrest Cloud app, open the app and allow all notifications.

Press **Sign Up** to create a new Amcrest Cloud account. If you have already signed up for Amcrest Cloud, login and skip to step 5.

3

I MOUNTED MY CAMERA UPSIDE DOWN, HOW DO I FLIP MY CAMERA'S VIDEO STREAM?

On the Amcrest Cloud app, locate the camera you wish to modify and tap the **settings** (⚙️) icon. In the settings menu, tap on **"Image Appearance"** and tap on **"Flip"**. Return to the previous menu and tap the **Save** button in the upper left-hand corner to save your settings.

To flip or mirror the camera's video stream on the Amcrest view Pro app, tap the flip/mirror (🔄) icon. You can also flip/mirror the camera via the web interface on a laptop or PC. For more information on how to flip/mirror the video stream on the web interface,

visit amcrest.com/flipimage

32

28

For access to a full user manual for your specific Amcrest device, please visit amcrest.com/support

1. **AMCREST WITH BULLET CAMERA INSTALLATION:** amcrest.com/webbulletinstall
2. **AMCREST WITH DOME CAMERA INSTALLATION:** amcrest.com/webdomeinstall

For more information on Alternative Access Methods visit amcrest.com/alternativeaccess

amcrest.com/remotewebscrt

REMOTE ACCESS DESKTOP SETUP

This setup method will be used for establishing and accessing your device remotely via a web interface on a desktop or laptop. For more information on local access desktop setup, visit amcrest.com/remotewebscrt

amcrest.com/remotewebscrt

AMCRESTVIEW.COM SETUP

This setup method will be used to setup a amcrestview.com connection for your device. The web page will connect via a 27 method through a designated web interface. For more information on how to setup a connection using amcrestview.com, visit amcrest.com/remotewebscrt

For additional setup methods for your Amcrest camera, refer to the **Alternative Access Methods**

DESKTOP ACCESS METHODS

For more information on general PC based access, visit: amcrest.com/general/pcaccess

1 AMCREST SURVEILLANCE PRO

The most stable and recommended method for accessing your camera from a computer. It is a free software, provided by Amcrest, that provides a means of accessing your devices from one central location without the use of a plugin or web browser.

For more information on Amcrest Surveillance Pro, visit: amcrest.com/surveillancepro

2 AMCREST BLUE IRIS

Amcrest Blue Iris is a professional Windows based surveillance software that allows you to view and record up to 64 IP cameras, or ONVIPCCTV based cameras simultaneously. It is a third party software that is compatible with a vast majority of IP cameras and DVR/NVR brands.

To purchase Amcrest Blue Iris, please visit: amcrest.com/blueiris

3 LOCAL DESKTOP ACCESS USING A WEB BROWSER

Most Amcrest cameras come equipped with the latest version of firmware that will allow you to access your camera from most mainstream web browsers without the use of a plugin. We recommend when accessing your camera to use Google Chrome since it is the most widely used and most efficient way to access your camera.

The camera will not work on older browsers such as Internet Explorer or other related web browsers. Mac users can use Safari or other compatible browsers as well to access their camera from a web browser. If your camera has firmware that will require a plugin it is recommended to use Internet Explorer as an alternative means of accessing your camera on a browser until a viable solution is available for your device.

For more information on how to access your camera locally using a web browser, please visit: amcrest.com/webui

SETUP YOUR CAMERA WITH AMCREST VIEW PRO

AMCREST VIEW PRO ETHERNET WIFI SETUP

Recommended WIFI setup method for adding a new WIFI camera to Amcrest View Pro.

- Please ensure your camera is plugged into a power source and your Ethernet cable is connected from the camera to your router. The Ethernet cable can be removed after setup.
- Make sure your camera and mobile device are on the same network during setup.

Download and open the Amcrest View Pro app from the App Store or Play Store.

Android users using Android 8.0 and above and iOS users using iOS 13.0 and above please allow location access to allow the app to access to the Wi-Fi network.

Once all permissions have been allowed, tap the **Start** button to begin setting up your camera.

amcrest.com/permissions for more information on setting up permissions.
