## 01 Setting Up the Camera

The Amcrest Smart Home app connects your Amcrest camera to your Android or iOS mobile device and must be connected to what matters most.

To get the app, search for "Amcrest Smart Home" in the Google Play or App Store.

**Note:** To add your device to the Amcrest View Pro Smart Home app list, please visit [amcrest.com/support](#).

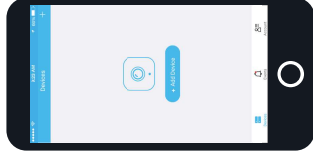

### Connecting to the SmartHome app

**Important:** Please complete the entire initial setup process and ensure your Wi-Fi router to ensure a stable connection.

Ensure your device is powered using the included power adapter and connect to the Amcrest Smart Home app.

Tap on "Register" to register an account. After registering and tap "Add Device".

You will need to allow all permissions and allow the camera to connect to your mobile device.

### Scan the QR Code or Manually Enter the S/N

Scan the QR code located on the bottom of your camera.

If you are unable to scan the QR code you can manually enter the serial "Manually enter SN".

### Choose Your Setup Method

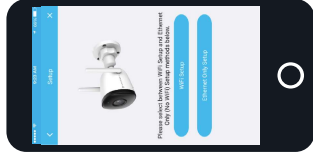

Choose between Wi-Fi and Ethernet Only. Setup. Please select the method you want to use. Ethernet connection, the camera cannot connect to both.

#### Wi-Fi (Recommended)

This method allows you to connect your camera to your network via Wi-Fi. The camera will be set up using the camera's built-in Wi-Fi hotspot.

#### Ethernet Only

This method uses an Ethernet only connection to connect the camera to the network. Follow the in-app instructions to complete setup.

**Note:** Your camera must be connected to a power source during either setup method.

## 02 Camera Features

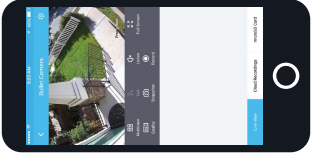

The main screen on the Ancrest Smart Home app will display a menu of all the added devices.

7

### Built-in Microphone

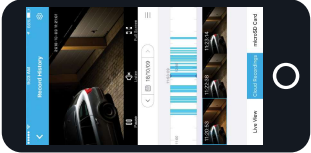

Use the built-in microphone feature to listen to what matters most, anytime, anywhere.

8

### SmartHome Cloud Storage

Use the Ancrest Smart Home genuine cloud service to view, record and playback events from a remote, off-site location.

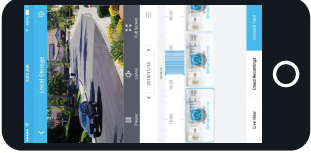

9

### MicroSD Card Storage

A MicroSD card can also be used to record and playback events locally.

**Note** The MicroSD card must be formatted by FAT32.

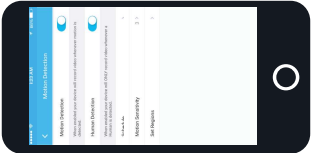

10

### Motion and Human Detection

Motion Detection allows you to receive alerts and automatically record events when motion is detected.

**Enable Human Detection** to only receive alerts when a human figure is detected.

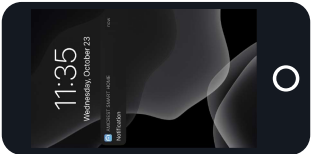

11

### Push Notifications

Receive push notifications directly from the app when motion is detected.

**Note** To learn more visit [ancrest.com/support](http://ancrest.com/support)
