FCC Class II Permissive change for FCC ID: ZZX761074

Original Grant Date: 04/07/2015

Dear Sirs,

This is to request a Class II permissive change for FCC ID: ZZX761074, originally granted on 04/07/2015.

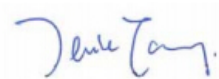

The circuit, PCB layout are identical to the original one.

The major change under this application is:

1. Added a 9V adaptor to the EUT.
2. The outlook is changed.
3. The model name is changed. And added some model names to this application:
761403,761485,761492, (only colour is different)
761481,761483,(only colour is different)
761478,761484,(only colour is different)

The external structure of the 761403,761481, and 761478 are different, so we perform all the test of these three models again.

Sincerely yours,

Jessie Tang
