相片 4：右面及底部照

The image displays two mobile phone batteries for comparison. The battery on the left is a NEC Li-ion battery, model G566d DECT Handset, with a capacity of 1100mAh and a voltage of 3.7V. It features a white label with black text and a barcode. The battery on the right is a generic Li-ion battery, model PN:1000058, with a capacity of 1100mAh and a voltage of 3.7V. It also has a white label with black text and a barcode. A ruler is placed below the batteries for scale.
