

ASCloud Manager device registration

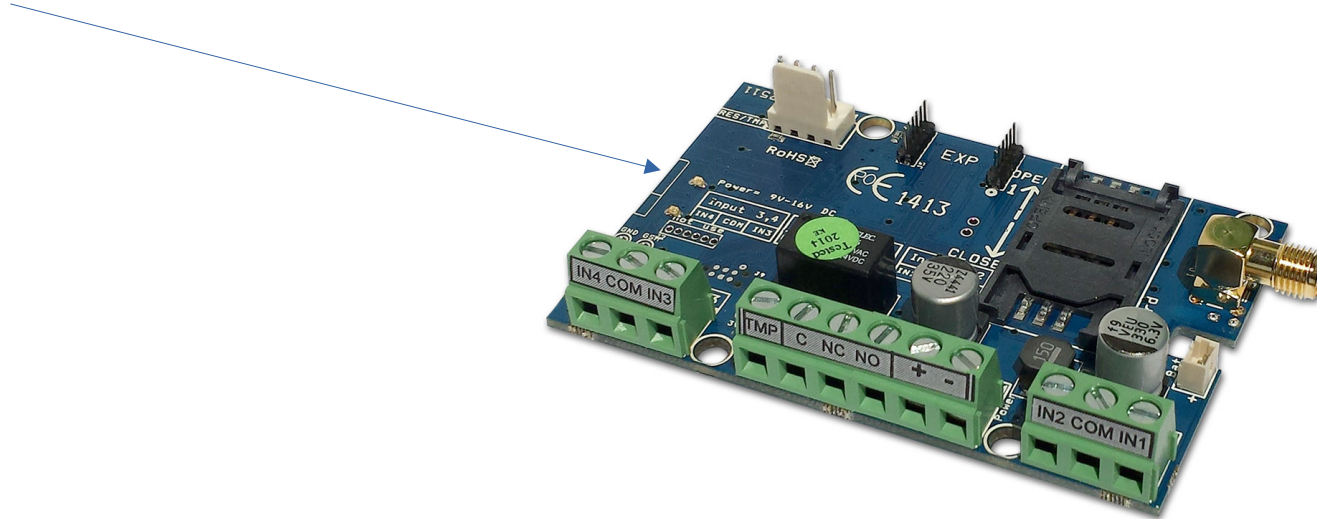

Description of registering the first GSM module in the ASCloud Manager.

Connect the GSM Module to the mobile network

Put your SIM card into the GSM module and wait until the module connects to the mobile network.

The green LED of the GSM module blinks 3-5 times indicating the signal strength.

Make sure you have active GPRS on the sim card and it is capable of sending text messages.

SIM registration in ASCloud Manager

Send an sms command from any number to the sim card based on the following SMS command:

<PASS>CLOUD=<APN>*

PASS: GSM moduls security codes (default:1234)

APN: network APN of the inserted SIM (for example: „internet“, „net“... etc)

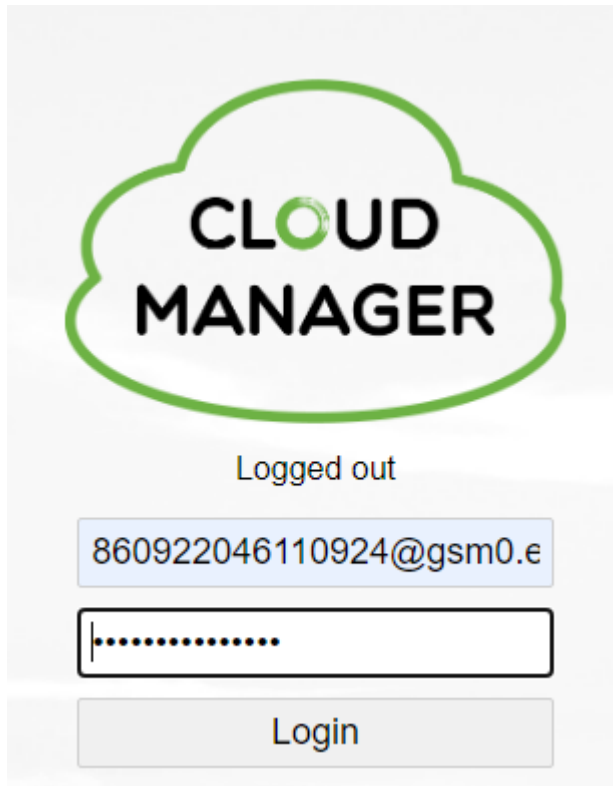

1234CLOUD=internet.vodafone
.net*

Cloud accept I/
860922046110924

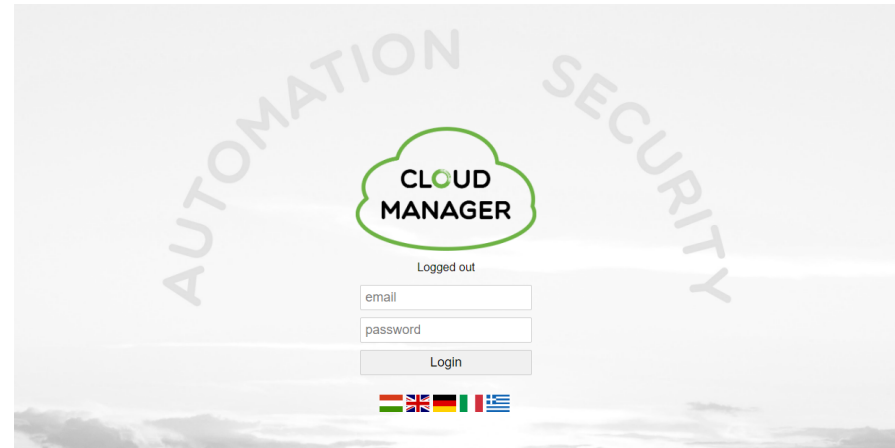

You will get the registered IMEI number via SMS within a minute as a confirmation of the successful registration.

Login to ASCloud Manager

Open the www.ascloudmanager.com website and add your GSM moduls IMEI numbers:

The image shows the ASCloud Manager login page. At the top is a green cloud logo with the text "CLOUD MANAGER". Below it, the text "Logged out" is displayed. There is a text input field containing the email address "860922046110924@gsm0.e". Below the email field is a password input field with masked characters ".....". At the bottom is a "Login" button.

The image shows the ASCloud Manager login page with a background featuring the words "AUTOMATION" and "SECURITY" in a large, light green font. The login form is centered and includes the "CLOUD MANAGER" logo, the text "Logged out", and input fields for "email" and "password". A "Login" button is at the bottom. Below the button are four small flags: Spain, United Kingdom, Germany, and France.

E-mail: **<IMEI>@gsm0.eu** ex: 860922046110924@gsm0.eu

Password: **<IMEI>** ex: 860922046110924

Login to ASCloud Manager

Add your **e-mail address** and **password** for managing your GSM device.
